1.0 Introduction

1.1 Overview of PhIS

Pharmacy Information System or better known as PhIS, is a complete and comprehensive system that integrates pharmacy related services geared towards pharmacy excellence. PhIS implementation would transform most of current manual process to electronic system would benefit facility end user in the health care sector.

There are 12 modules to assist services delivery by the health care sector which comprises of:

1. Order Management
2. Inpatient Pharmacy
3. Outpatient Pharmacy
4. Medication Counselling
5. Ward Pharmacy
6. Pharmacy Inventory IV
7. Manufacturing of Cytotoxic Drug Reconstitution, Parenteral Nutrition, Admixture & Eye Drop , Radiopharmaceuticals and Extemporaneous
8. Adverse Drug Reaction & Drug Allergic (ADR & DAC)
9. Clinical Pharmacokinetics Services (TDM)
10. Drug Information & Consumer Education (DICE)
11. Medication Therapy Adherence Clinic (MTAC)
12. Data Mining (PhARM)

1.2 Purpose and Objectives

This user manual outlines the Order Management module and its key features and functionalities. The primary objective is to help guide user through the process of completing PhIS application process.

User will understand the following activities in details:

- Medication Order
- Manage Order
- Order Endorsement
- Order Authorization

1.3 Organized Sections

These are the sections within this document:

- Section 1 : Introduction
- Section 2 : Application Standard Features
- Section 3 : Medication Order
- Section 4 : Acronyms
- Section 5 : Links to Clinical Modules

2.0 Application Standard Features

2.1 PhIS Legend

Standard Legend			
	Login to PhIS		Logout from PhIS

2.2 Latest Enhancement and Updates

Latest Functions	Page
Renew Medication: No need to display alert on duplicate drug if new order start date = previous order end date. Applicable for Outpatient only.	33
Disable Print Prescription before confirm the order at: 1. Record Prescription (formerly known as Transcribe Order) 2. Medication Order 3. Discharge Order	18 28
Rename Menu Name: 1. 'Manage Order' rename to 'Manage Prescription'	43
Stop medication in Manage Prescription once patient deceased	45

3.0 Order Management

Overview

The Order Management module handles all the information to specify the ordered items as per local drug formulary, MOH and non-MOH including registered and non-registered drugs. This function is to enable data mining. All medication orders must be prescribed by authorized personnel only and in compliance with guidelines on prescribing in the drug formulary (drug category, discipline / specialty) as defined by MOH.

User Group

This module is intended for specialist, Medical Officer (MO), and Housemen (subject to the assigned by the facility.)

Functional Diagram

Figure 3.0-1

Functional Description

Medication Order comprises of five (4) main functions:

- **Normal Order**
To prescribe normal order
- **Manage Order**
To monitor patient's prescription by modifying order, stop order and tapering up/down.
- **Order Endorsement**
The prescriber to endorse the intervention made by a Pharmacist
- **Order Authorization**
To approve list A/ A*/ A/KK drug that requires authorization

3.1 Medication Order

Medication order is designed to prescribe drugs for the patient.

3.1.1 Record Allergy

Figure 3.1.1-1 Order Screen Listing Page

Note

PhIS Screen menu/sub menu will be displayed according to user access right.

STEP 1

Click on 'Order Management' menu and follow by 'Medication Order' sub-menu

Note

- Prescriber have the options to view patient by clicking the check box:
 - a) Show All
 - b) Show All By Location
- By default, list of patients will be displayed according to prescriber's location access.
- Various search criteria are provided as below:

No	Field	Description	Remark
A	MRN	Patient Medical Record Number	Search option: <ul style="list-style-type: none"> • Type the MRN either full or partial: Example: HPSF00001234 or "1234"
B	Patient Name	Patient Name	Allow to search by patient full name or partial
C	Location	Patient visit location	Able to filter and search patient by visit location and prescriber's location.
D	Visit Date	Visit Date	Patient visits on the facility

Table 3.1.1-1

Note

Search result of patient record list will be displayed:

- MRN
- ID No
- Patient Name
- Location
- Prescriber Name
- Visit Type
- Encounter No
- Visit Date
- Order Status

Figure 3.1.1-2 Order Screen Listing Page

STEP 2

Click on the selected patient as in Figure 3.1.1-2

Note

- Order Status = 'ORDERED', confirmed prescription.
- Order Status = 'Draft', prescription which saved but not yet confirmed.

Figure 3.1.1-3 Drug Ordering Screen

Note

- When the selected patient name is clicked, the summary of patient information will be displayed in the patient banner. The patient banner will be displayed at the specific screen only when patient information is required. Below is the list of patient information:
 - Patient Name
 - Patient Address
 - Patient IC Number
 - Patient Phone and Email
 - Patient Diagnosis
 - Patient Age
 - Patient Allergy
 - Patient Gender
 - Patient MRN

Figure 3.1.1-4 Patient Allergy Screen

STEP 3

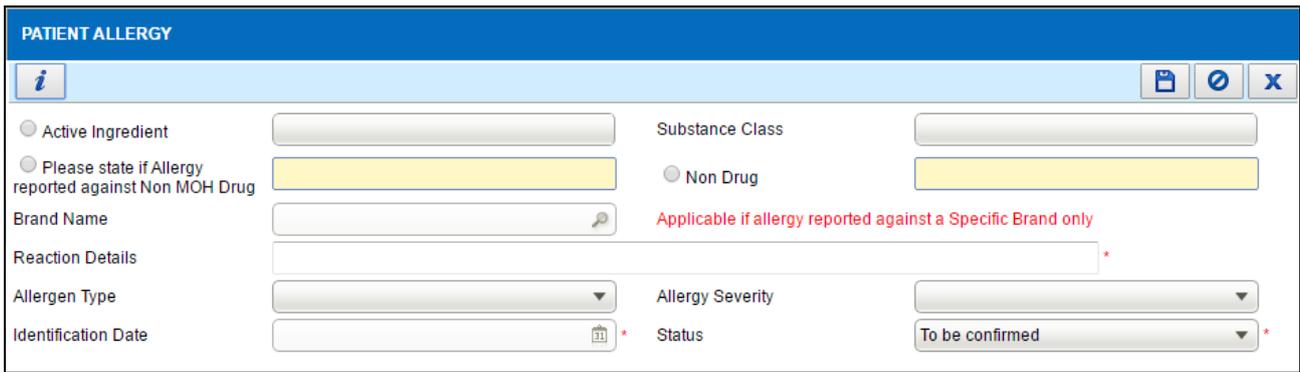

Click on the  button to record allergy

STEP 4

Click on the  button to add new allergy

Note

- By default for all patient system will checked on **No Known allergy** box if the patient does not have any allergy.
- User only needs to click  button if there is allergic need to be recorded.
- The normal order screen displayed blue hyperlink as below:
 - Lab Results
 - Counselling History
 - Demographic
 - Pharmacist Notes
 - Medication Profile
 - Other Appoinment
- The normal order screen displayed information as below:
 - Encounter No
 - Admision Date
 - Attending Practitioner
 - Visit Location
 - Rx No
 - Reference NO

 Save button (floppy disk icon) is circled with **10**.

Figure 3.1.1-8 Allergy Detail Screen

Note

Below are the optional fields to be entered:

- a) Brand name
- b) Allergen Type
- c) Allergen Description
- d) Allergy Severity

STEP 10

Click on the  button to save, followed by  button to close existing screen

3.1.2 Record Diagnosis

This function is used for prescriber to record summary patient's diagnosis. Record patient diagnosis for every visit is a mandatory process in order to prescribe medication.

Figure 3.1.2-1 Diagnosis Landing Screen

STEP 1

Click on the  button to open diagnosis screen

Note

- **Diagnosis History** to view patient's diagnosis history.
- **Copy** button for record same diagnosis, user need to click on the **Copy** button and click on the  button to save, followed by  button to close existing screen.

STEP 2

Click on the  button to add new diagnosis

Figure 3.1.2-2 Diagnosis Detail Screen

STEP 3

Enter **Record Date / Time**

STEP 4

Enter **Diagnosis Description**

STEP 5

Click on the  button to save, followed by  button to close existing screen

Note

- **Record Date/Time** system will default to current date and time, but the user still has the option to select from calendar.
- **Status** will be defaulted to **Confirmed** but users can select from the drop down box for other status:
 - Confirmed
 - Resolved
 - Suspected
 - To be Confirmed

3.1.3 Normal Order

This function is used to prescribe medication for both inpatient and outpatient department.

MRN	ID No	Patient Name	Location	Prescriber Name	Visit Type	Encounter No	Visit Date	Order Status

<input checked="" type="checkbox"/>	Oral Tablet	Ferrous Fumarate 200 mg Tablet	Oral	2 tablet	BD (twice daily)	4 Months	Haemat inics

Figure 3.1.4-4 Favorite Drug List

- Tick the checkbox to select the drug as per Figure 3.1.4-4
- Once all required drugs are selected, click button.
- User can select all the drugs from all the **Favourite** pages before clicking button.

3.1.5 Split Dose

This function is used to create multi dosing in a way to administer in a different time with different dosage.

Figure 3.1.5-1 Normal Order Screen

Note

To prescribe split dose, repeat as normal order from **Step 1** to **3**.

STEP 1

Click on the **Dosage Schedule** button and dose schedule screen will display as per Figure 3.1.5-2

Figure 3.1.5-2 Split Dose Schedule Screen

STEP 2

Change the dose for each **Administration Time**

Note

Prescriber is allowed to change the admin time if necessary. Number of column displayed based on frequency selected.

STEP 3

Click on the  button to save record

The screenshot displays the 'DRUG DETAILS' form in the PhIS system. The form includes fields for Drug, Dosage, Admin Route, Frequency, Duration, Start Date / Time, End Date / Time, Order Quantity, Drug Indication, Drug Remarks, and Dispensing Location. A 'Duration' dropdown menu is open, showing options like '60 Days'. A 'Confirm' button is circled in red with the number '6'. A 'Split Dose' dropdown is also circled in red with the number '4'. A 'Confirm' button is circled in red with the number '5'. A navigation bar at the top right contains buttons for 'View Order', 'Confirm', and 'Draft'. A table at the top right shows columns for 'Alert', 'Drug Name', 'Order Details', 'Order Qty', and 'Drug Info'.

Figure 3.1.5-3 Normal Order Screen

STEP 4

Enter **Duration** and select days/months or weeks from drop down menu

STEP 5

Click on the  button to add drug in prescription list

Note

Split dose is only applicable for selected drug as defined in the Drug Master setup

STEP 6

Click on the  button to confirm order

3.1.6 Tapering

Tapering is a function to prescribe same drug with gradually decreasing or increasing the drug dosage by specific duration and time. Tapering drug functions divided into two (2) categories which are taper up / increase dosage or taper down /decrease dosage. Only selected drug which has been defined in drug master set up are allowed to do tapering.

Figure 3.1.6-1 Taper Up Option Screen

Note

To taper prescribed drug, order the first dose as normal order from **Step 1** to **5**.

STEP 1

Right click on the ▼ button from the selected drug

STEP 2

Select **Taper Down** and the **Drug Details** will be display

Figure 3.1.6-2 Drug Details Screen

STEP 3

Change the **Dosage** and **Duration of drugs** as required.

Note

For Taper up, dosage cannot be same or decreased than previous dosage. Same as for Taper down, the dosage cannot be same or increased. System will display error message as per Figure 3.1.6-3. Click the  button and modify the details.

Figure 3.1.6-3 Tapering Error Message

STEP 4

Click on the  button to save record

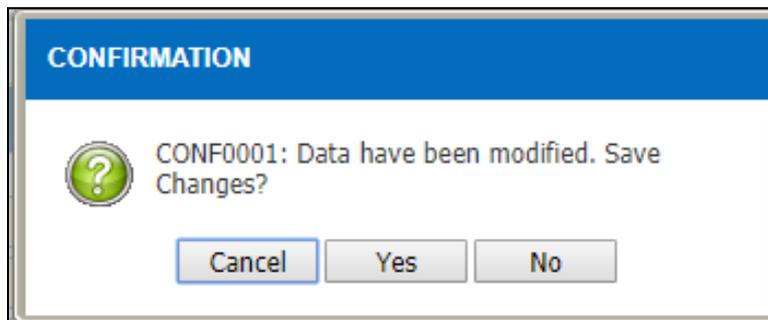

Figure 3.1.6-4 Confirmation Alert Message

Figure 3.1.6-5 Information Alert Message

STEP 5

Click on the  button to proceed tapering

Alert	Drug Name	Order Details	Order Qty	Drug Info
1.	Prednisolone 5 mg Tablet	5 mg, OD (once daily), Oral Tablet, Oral, 25/07/2017 (3 Days)	3 tablet	 
	Prednisolone 5 mg Tablet(Taper Up)	10 mg, OD (once daily), Oral Tablet, 28/07/2017 (5 Days)	10 tablet

STEP 8

Click on the  button

3.1.7 Discharge Medication

This function is only for inpatient discharge medication. The discharge medication can be prescribed before the patient being discharge.

Figure 3.1.7-1 Discharge Medication Listing Page

STEP 1

Click on the 'Order Management' menu and followed by 'Discharge Medication' sub-menu

Note

- By default, list of patient will be displayed according to prescriber location access
- Various search criteria is provided as below:

No	Field	Description	Remark
a	MRN	Patient Medical Record Number	Search option: <ul style="list-style-type: none"> • Type the MRN either full or partial: Example: HPSF00001234 or "1234"
b	Patient Name	Patient Name	Allow to search by patient full name or partial
c	Location	Patient visit location	Able to filter and search patient by visit location
d	Visit Date	Visit Date	Patient visits on the facility

Table 3.1.7-1

- Search result of patient record list will be displayed:
 - MRN
 - ID No
 - Patient Name
 - Location
 - Prescriber Name
 - Visit Type
 - Encounter No
 - Visit Date
 - Order Status

STEP 2

Click on the  button to search patient

STEP 3

Double click on the selected patient record

The screenshot shows the 'DISCHARGE MEDICATION' interface. At the top, there is a patient information summary including Mykad, Age (62 Years 04 Months 22 Days), Gender (Female), and MRN (HPSF00003295). Below this, there are fields for Address, Diagnosis, and Known Allergies. A 'VISIT RECORD' section is visible, and the 'NORMAL ORDER' tab is selected. The 'DRUG DETAILS' form includes fields for Drug, Dosage, Admin Route, Frequency, Duration, Start Date / Time, End Date / Time, Order Quantity, Drug Indication, Drug Remarks, Drug Category, and Dispense Location. There are also checkboxes for 'Own Medication', 'Patient Require', and 'Counselling'. A table on the right shows the order details with columns for Alert, Drug Name, Order Details, Order Qty, and Drug Info.

Figure 3.1.7-2 Discharge Medication Screen

Note

- Follow the step as normal order in Section 3.1.3 as Normal Order.
- Discharge medication only applicable for Inpatient, Day care and Emergency patient.
- Once the order is confirmed, user able to see the  button as per Figure 3.1.7-3 and print the prescription if required.

This screenshot is similar to Figure 3.1.7-2 but highlights the 'Prescription' button in the top right corner of the 'DRUG DETAILS' section. The 'Drug' field is filled with 'Warfarin Sodium 2 mg Tablet'. The 'Order Qty' is 60. The 'Order Details' column in the table below shows '2 mg, PM (every evening), Oral Tablet, Oral, 25/07/2017 (60 Days)'. The 'Alert' column shows a warning icon and the number '1'.
