1.0 Introduction

1.1 Overview of PhIS

Pharmacy Information System or better known as PhIS, is a complete and comprehensive system that integrates pharmacy related services geared towards pharmacy excellence. PhIS implementation would transform most of current manual process to electronic system would benefit facility end user in the health care sector.

There are 12 modules to assist services delivery by the health care sector which comprises of:

1. Order Management
2. Inpatient Pharmacy
3. Outpatient Pharmacy
4. Medication Counselling
5. Ward Pharmacy
6. Pharmacy Inventory
7. Manufacturing of Cytotoxic Drug Reconstitution, Parenteral Nutrition, IV Admixture & Eye Drop, Radiopharmaceuticals and Extemporaneous
8. Adverse Drug Reaction & Drug Allergic (ADR & DAC)
9. Clinical Pharmacokinetics Services (TDM)
10. Drug Information & Consumer Education (DICE)
11. Medication Therapy Adherence Clinic (MTAC)
12. Data Mining (PhARM)

1.2 Purpose and Objectives

This user manual outlines the Infusion Order sub-module and its key features and functionalities. The primary objective is to guide user through the process of completing PhIS application process.

User will understand the following activities in details:

- Medication Order – Infusion
- Manage Order
- Order Endorsement
- Authorisation

1.3 Organised Sections

These are the sections within this document:

- Section 1 : Introduction
- Section 2 : Application Standard Features
- Section 3 : Medication Order-Infusion Order
- Section 4 : Acronyms
- Section 5 : Links to Clinical Modules

3.0 Order Management- Infusion Order

Overview

The Order Management-Infusion Order module handles all the information to specify the ordered items as per local drug formulary, MOH and non-MOH including registered and non-registered drugs. This function is to enable data mining. All medication orders must be prescribed by authorized personnel only and be in compliance with guidelines on prescribing in the drug formulary (drug category, discipline / specialty) as defined by MOH.

User Group

This module is intended for specialist, Medical Officer (MO), Medical Assistance (MA) and Housemen. (subject to the user assigned by the facility)

Functional Diagram

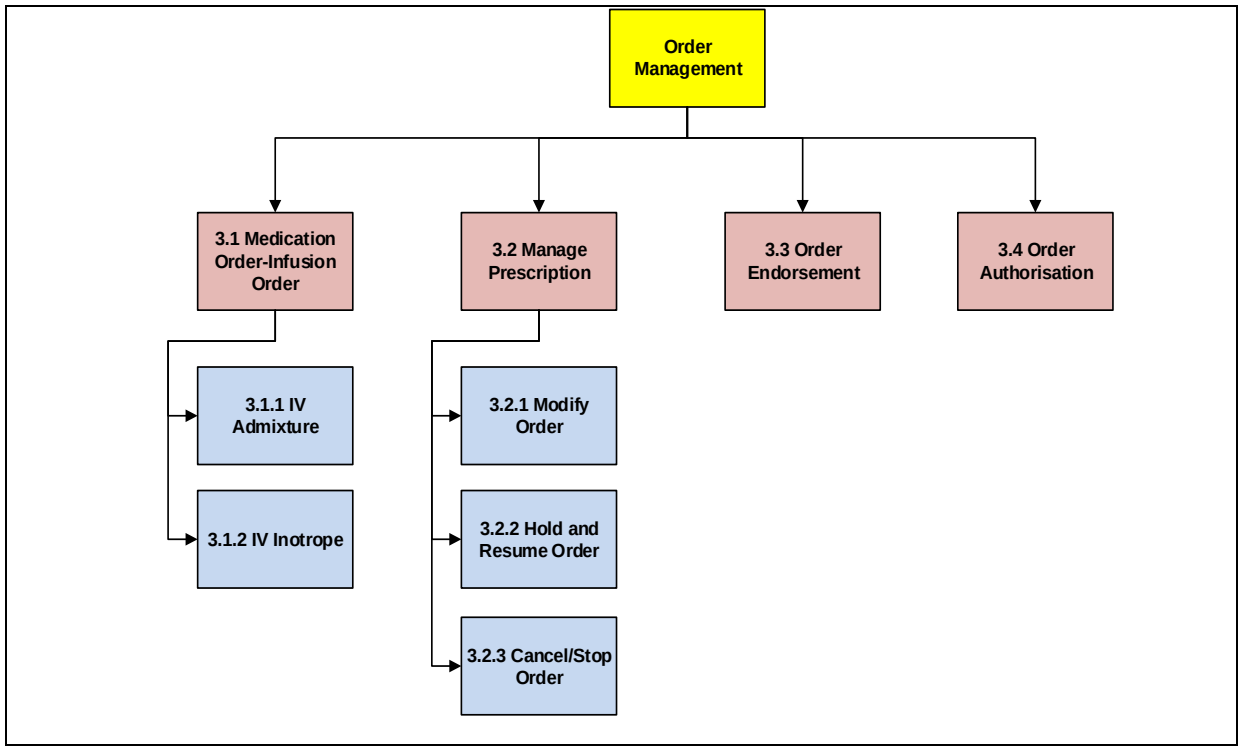

Figure 3.0-1

Functional Description

Medication Order comprises of four (4) main functions:

- **Medication Order- Infusion Order**

  To prescribe:

  - IV Admixture
  - Inotrope order

- **Manage Prescription**

  To monitor patient's prescription including modify order, hold/resume order and cancel/stop order

- **Order Endorsement**

  Order endorsement is to notify prescriber of prescription changes made by pharmacist. Prescriber can endorse the intervention made by a Pharmacist

- **Order Authorization**

  To approve list A/ A*/ A/KK drugs that require authorization

3.1 Medication Order-Infusion

Infusion order is used to prescribe medicine for Inpatient, Emergency and Day Care departments based on the facility setup.

3.1.1 IV Admixture

This function is for a prescriber to order injectable medication that requires further dilution before administration. However, it is only applicable for medication that is diluted by pharmacy department. If the dilution is prepared by nursing personnel, the normal order function is to be used.

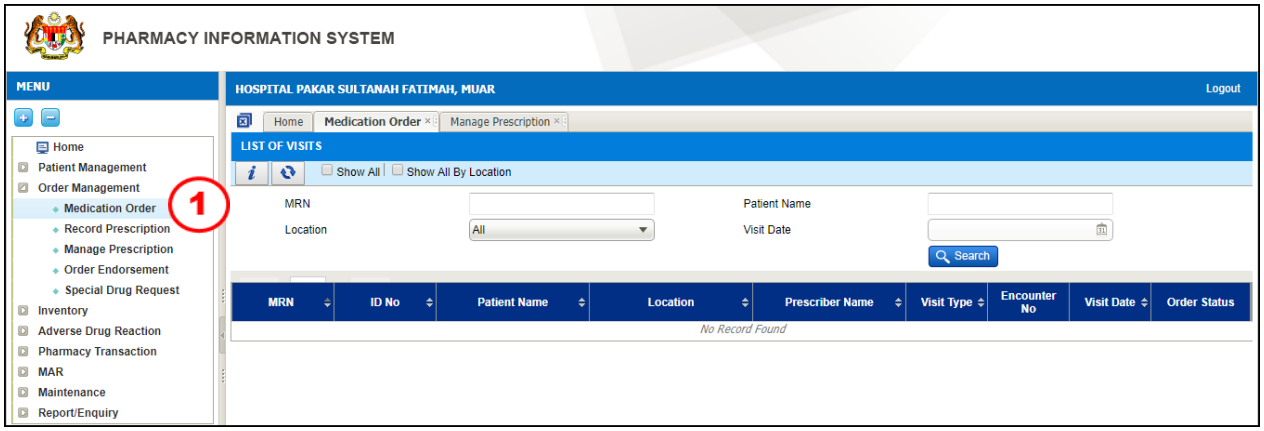

Figure 3.1.1-1 Medication Order Page

STEP 1
Click on the 'Order Management' menu and follow by 'Medication Order' sub-menu

Note

- *Prescriber can select either of these options: Click on the show all checkbox to view all patients assigned to the login prescriber or click on the show all checkbox to view patients assigned to prescriber login location and not assigned to other prescriber.*
- *Assigning of patients will be based on access rights.*
- *By default, a list of patients will be displayed according to patient assigned to login prescriber and prescriber's login location.*

- *Various search criteria as provided as below:*

No	Field	Description	Remark
a)	MRN	Patient Medical Record Number	Search option: • Type the MRN either full or partial: *Example: HPSF00001234 or "1234"*
b)	Patient Name	Patient Name	Allow to search by full or partial patience name
c)	Location	Patient visit location	Able to filter and search patient by visit location and prescriber's location.
d)	Visit Date	Patient visit date	Able to filter and search patient visit date

Table 3.1.1-1

Note

Search results of patient record list will display:

- *MRN*
- *Patient Name*
- *Location*
- *Prescriber Name*
- *Visit Date*
- *Order Status*

Prescriber is allowed to manage order after it is confirmed.

3.2.1 Modify Order

Prescriber is allowed to modify Dosage, Frequency Duration and Counseling Indication if the ***Order Status*** is ordered.

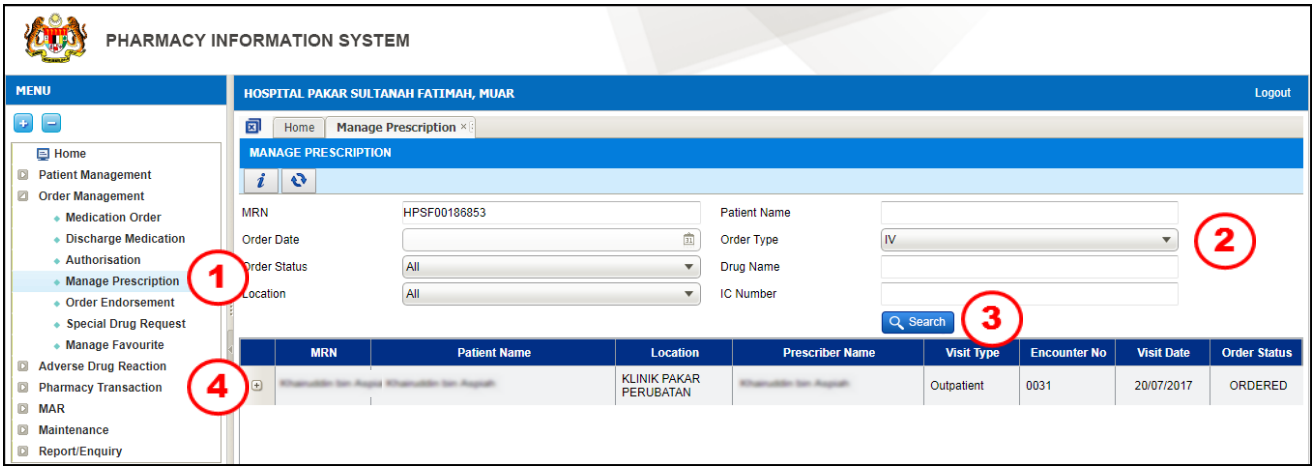

Figure 3.2.1-1 Manage Prescription Screen

STEP 1

Click on the 'Order Management' menu and follow by 'Manage Prescription' sub-menu

Note

- *On this listing page, various search criteria is provided as below:*

No	Field	Description	Remark
A	MRN	Patient Medical Record Number	Search option: • Scan the MRN using barcode scanner. • Type the MRN either in full or partially:. *Example : HPSF00001234 or "1234"*
B	Order Date	Order date	Allow to search by ordered date
C	Order Status	According to Order in which stage	Able to filter by order status
D	Location	Patient visit location	Able to filter and search patient name by visit location
E	Patient Name	Patient Name	Allow to search by patient name
F	Order Type	- Normal - CDR - IV - PN - Radiopharmaceuticals	Allow to search by order type
G	Drug Name	Drug Name	Allow to search by full or partial drug name

Table 3.2.1-1

- *Search results of patient record list will display:*
  - *MRN*
  - *Patient Name*
  - *Location*
  - *Prescriber Name*
  - *Visit Type*
  - *Encounter No*
  - *Visit Date*
  - *Order Status*

STEP 2

Select ***Order Type*** as ***IV***

STEP 3

Click on the Search button to search patient

STEP 4

Click on ⊞ button to view selected patient's prescription

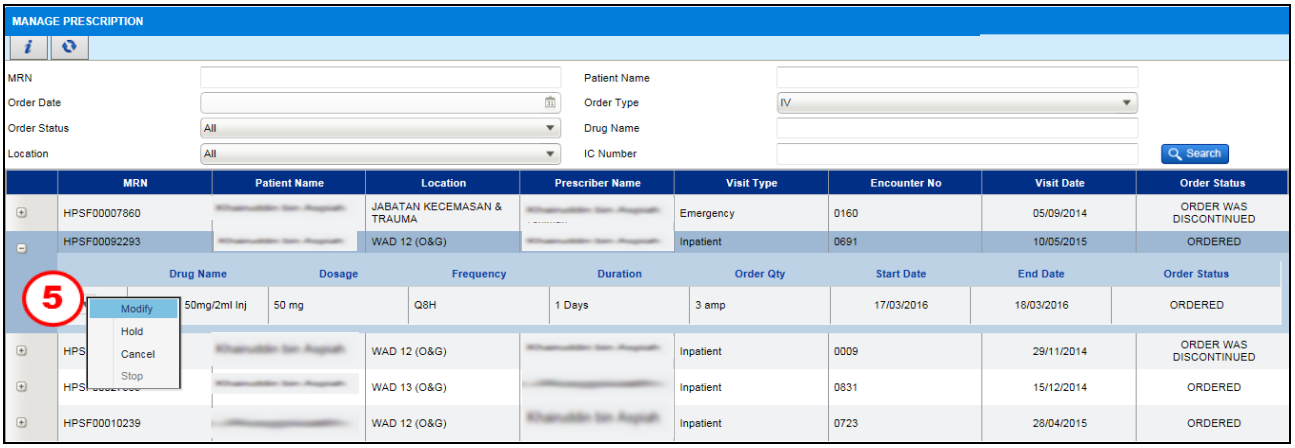

Figure 3.2.1-2 Manage Prescription Screen

STEP 5

Right click on the ▼ button and select ***Modify***

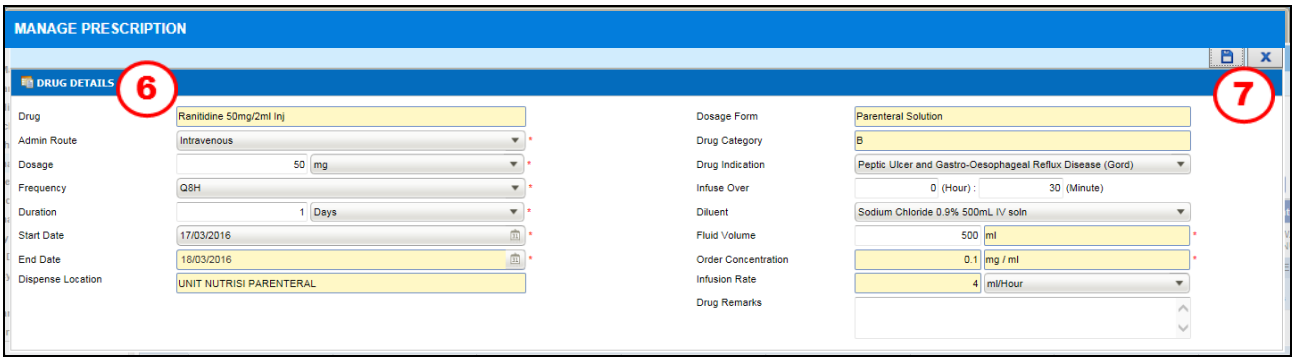

Figure 3.2.1-3 Manage Prescription

STEP 6

Change the drug details as required like shown in Figure 3.2.1-3

Note

Prescriber is allowed to change the drug details as below:

- *Admin Route*
- *Dosage*
- *Frequency*
- *Duration*
- *Start Date/Time*
- *Drug Indication*
- *Infuse Over*
- *Diluent*
- *Fluid Volume*
- *Infusion Rate UOM*

STEP 7

Click on the button to save and button to close

3.2.2 Resume/Hold Order

Prescriber is allowed to hold medication order from being administered or dispensed to the patient; and is able to resume the hold order to continue medication order.

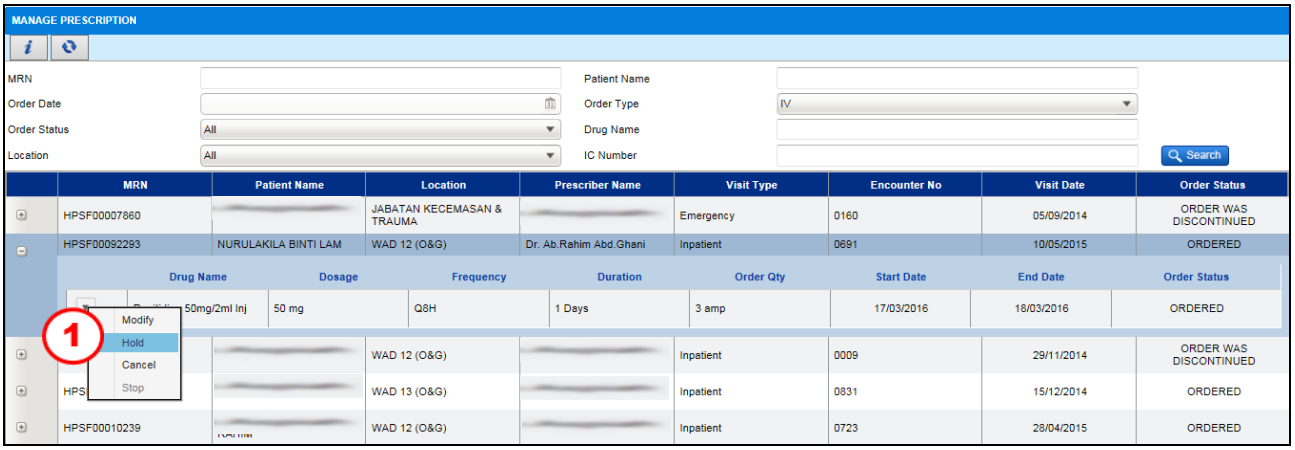

Figure 3.2.2-1 Manage Prescription Screen with Hold/Resume Menu

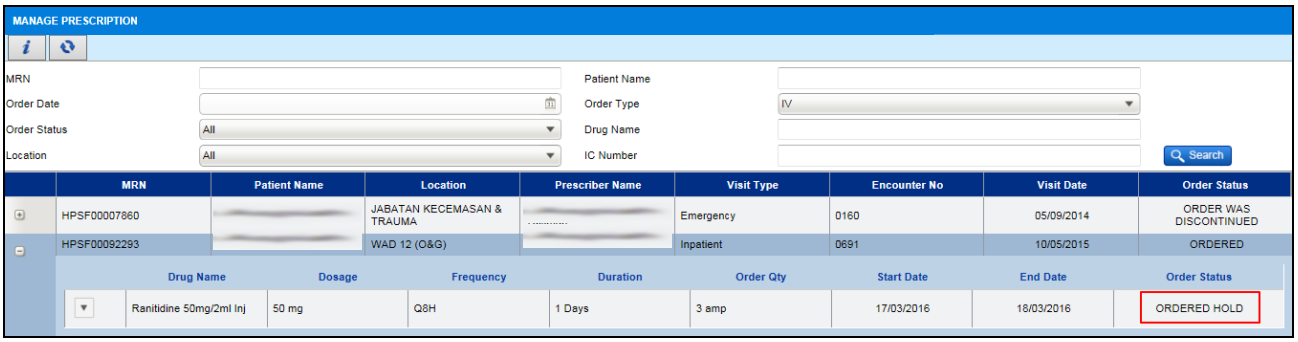

Figure 3.2.2-2 Manage Prescription Screen With Hold status

Note
*To proceed with Hold/Resume medication order repeat Modify Order steps from **Step 1** to **4***

STEP 1
Right click on the button and select ***Hold*** or ***Resume***

Hold Medication Order
- Right click on the button and select ***Hold***

Resume Medication Order
- Right click on the button and select ***Resume***

Note
*Order status will be changed according to the current Order Status followed by '**Hold**'.*
*Example : **ORDERED HOLD***

3.2.3 Cancel/Stop Order

Prescriber is allowed to cancel or stop the prescribed medication order from being administered or dispensed.

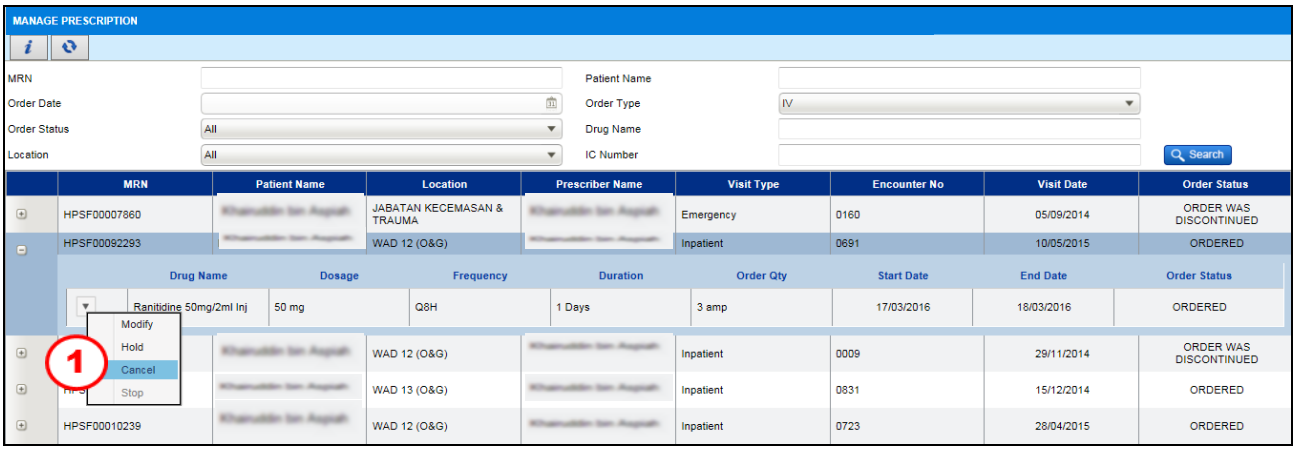

Figure 3.2.3-1 Manage Prescription Screen with Cancel/Stop Menu

Note

*To proceed with cancel or stop medication order, repeat Modify Order steps from **Step 1** to **4.***

STEP 1

Right click on the button and select ***Cancel*** or ***Stop***

Cancel Medication Order

- Right click on the button and select ***Cancel*** from context menu

Enter ***Cancel Reason*** as per Figure 3.2.3-2

Click on the save button to save the order cancellation

Note
