1.0 Introduction

1.1 Overview of PhIS

Pharmacy Information System or better known as PhIS, is a complete and comprehensive system that integrates pharmacy related services geared towards pharmacy excellence. PhIS implementation would transform most of current manual process to electronic system would benefit facility end user in the health care sector.

There are 12 modules to assist services delivery by the health care sector which comprises of:

1. Order Management
2. Inpatient Pharmacy
3. Outpatient Pharmacy
4. Medication Counselling
5. Ward Pharmacy
6. Pharmacy Inventory
7. Manufacturing of Cytotoxic Drug Reconstitution, Parenteral Nutrition, IV Admixture & Eye Drop, Radiopharmaceuticals and Extemporaneous
8. Adverse Drug Reaction & Drug Allergic (ADR & DAC)
9. Clinical Pharmacokinetics Services (TDM)
10. Drug Information & Consumer Education (DICE)
11. Medication Therapy Adherence Clinic (MTAC)
12. Data Mining (PhARM)

1.2 Purpose and Objectives

This user manual outlines the Inpatient Pharmacy sub-module and its key features and functionalities. The primary objective is to help guide user through the process of completing PhIS application process. User will understand the following activities in details:

- Transcribing
- Patient Registration
- Screening & Verification
- Preparation
- Dispensing
- Fill List
- Released / Discard Batch
- Medication Return
- Re-Dispensing

3.0 Inpatient Pharmacy

Overview

The Inpatient Pharmacy module include Implementing safe, organized, and efficient drug-dispensing system is essential for controlling costs and assuring that the medical prescription is safely followed as requested within the appropriate deadline. An appropriate dispensing system is an important ally for the prevention or reduction by medication errors by helping to minimize dispensing error opportunities in a pharmacy. At present there are various types of dispensing systems for medical prescription within a hospital.

User Group

This module is intended for pharmacist (subject to the user assigned by the facility)

Functional Diagram

Figure 3.0-1

Functional Description

Inpatient Pharmacy comprises of seven (8) main functions:

- **Transcribing**

Transcribing function is used to transfer manual prescription to online prescription. All prescriptions are required to be key in into system in order to proceed with dispensing process such as patient demographic and order details. Transcribing is combination of 2 process which is ordering and dispensing which consist of ordering, acknowledgement, verification, preparation and dispensing in single workflow.

- **Screening & Verification**

Screening and verification is for the pharmacist to verify the prescriptions received from order management. This process is mandatory for all prescriptions receive before the user can proceed with dispensing preparation. There are also safety systems that warn against toxic doses, allergic and cross-reactions, drug interactions, duplication of therapeutic classes, contraindications, and adverse effects.

- **Preparation**

The prescription and the drug preparation are made in the system that may integrated with inventory system. Professionals access system data directly with no need to send files or manual drug labeling.

- **Dispensing**

The prescription and the dispensing report are made in the system that may integrated with inventory system

- **Fill List**

User is allowed to make unit dose dispensing for a selected nursing unit's entire list of patients of medication orders as a batch process. The dispensing process like preparation and dispensing will be done from the same screen for an entire list of patient from a selected nursing unit.

- **Release / Discard Batch**

Allow the user to release the drug reserved for the patient back into inventory. This list will a contain list of drugs with 'Uncollected', 'Prepared' or 'Hold' status. User need to release this drug in order for it to be available in the drug inventory list. The status of allocated (reserved quantity) will change to available quantity.

- **Medication Return**

Allow the user to return any unused drugs back to inventory. This screen will allow the user to Create New Record and Confirm Online Request. 'Confirm Online Request' is used to manage medication return requests made by nurses for medication returned for all unused medication from inpatient upon the patient's discharge.

- **Re-Dispensing**

Allow the user to re-issue medication to the patient due to spilled, broken or lost. Only Authorized users will be able to access this process.

3.1 Search Registered Patient

To view an existing patient record, please perform the steps below.

Figure 3.1-1 PhIS Home Page

STEP 1

Click on 'Order Management' menu followed by 'Record Prescription' and screen will be displayed as per Figure 3.1-1

Figure 3.1-2 Medication Order

STEP 2

Select type of details of patient details.

STEP 3

Click on the  button to search for a registered patient

Note

If the patient is not registered, click on the  button and the Patient Registration screen will be displayed.

3.3 Inpatient Pharmacy (IP) Order

To perform these steps below to create new order

The screenshot displays the 'MEDICATION ORDER' interface. At the top, it shows patient details for CIK NEETA, including Mykad, Age (32 Years 09 Months 16 Days), Gender (Female), and Address. Below this, there are fields for Encounter No (0001), Visit Type (Outpatient), Location (Klinik Pakar 3 (Medical & Dermatology)), and Department (General Medicine). The 'VISIT RECORD' section shows the Original Prescription Serial Number (11111). The 'NORMAL ORDER - DRUG DETAILS' section is the primary focus, with a red circle and the number '1' highlighting the search button next to the 'Original Prescriber Name' field. Other fields in this section include Drug, Dosage, Admin Route, Frequency, Duration, Start Date / Time, End Date / Time, Order Quantity, Drug Indication, Drug Remarks, and Available Qty. A table with columns 'Alert', 'Drug Name', 'Order Details', 'Order Qty', and 'Drug Info' is visible on the right. The bottom of the form has '+ Add', 'Modify', and 'Clear' buttons.

Figure 3.4.1-2 Screening & Verification

STEP 5

Click on the  button to proceed verification process

Note

- When selected patient name is clicked, the summary of patient information will be displayed in the patient banner. The patient banner will be displayed at the specific screen which is required patient information. Below is the list of patient information:
 - Patient Name
 - Patient Address
 - Patient IC Number
 - Patient Phone and Email
 - Patient Diagnosis
 - Patient Age
 - Patient Allergy
 - Patient Gender
 - Patient MRN
- Below options are provided for user to view the additional patient information. Click on the hyperlink as below:
 - Lab Parameter**
 - Patient's laboratory test results.
 - Counselling History**
 - Medication counselling history records.
 - Demographic**
 - Patient's demographic details.

d) Pharmacist Notes

- Pharmacy notes such as MTAC, Ward Pharmacy and etc.

e) Medication Profile

- This hyperlink will show the patient's current medication and previous medication history.

f) Other Appointments

- This screen provides information if there are any other appointments recorded for the patient.

- Current visit information will be displayed as below:

- Admission Date
- Attending practitioner
- Visit location
- Room No / Bed No
- Rx No

- Prescription from order management will be displayed as below:

- Alert
- Drug Name
- Order Detail
- Order Qty - Quantity of drug ordered by the prescriber.
- Reserve Qty
- Balance Qty
- Remarks
- Drug Counselling
- Prev Disp Qty
- Freshly Prepare
- Status
- Drug Info

- To skip preparation screen, tick on the Proceed to Dispense checkbox.
- Select ENGLISH check box to print in English language.

Note

- Once the button  is clicked, system will automatically calculated the quantity in **Reserve Qty** field base on quantity in Supply Duration field.
- A notification icon  in the Remarks column is display if there are past Remarks in all dispensing screens. User will be able to view past Remarks (with timestamp & NAME OF PERSON making remark), including the doctor's remark as per Figure 3.4.1-3.
- MTAC History link in all dispensing screen (patient banner).

Figure 3.4.2-1 Screening & Verification - Intervention

Note

Repeat Step 1 to Step 5 as in verify prescription as per Figure 3.4.1-1 before perform Intervention steps.

STEP 1

Click on the checkbox as per Figure 3.4-2-1

STEP 2

Click on intervention button for Intervention as per Figure 3.4-2-1

Figure 3.4.2-2 Intervention

STEP 3

Choose the **Intervention Reason** by tick at the checkbox of the column **Selection**:

- Authenticity
- Contraindication
- Drug Interaction
- Inappropriate Dose
- Inappropriate Drug
- Inappropriate Duration

STEP 4

Enter remarks of intervention reason.

STEP 5

Click on the  to save the intervention reason. Once do that, the drugs information will be change from grey to yellow.

Note

- *Intervention reason will be updated to all drugs listed in the screen.*
- *Background color for the drugs change from grey to Yellow, means the records is being updated on the intervention reason but no modification been done.*
 - a) *There were also some color indicator highlighted for a drug row, when user do the intervention:*
 - i. **GREEN**- *Modify with Intervention Reason:- user able to save changes.*
 - ii. **YELLOW**- *Add Reason only:- user able to save changes.*
 - iii. **RED**-*Modify without Reason:- user are not able to save changes. User need to add in at least one reason to save changes.*

3.5.4 Extemporaneous – By Patient

This function is used to generate and print the Ingredient label prepared for patient, based on drugs setup. Extemporaneous preparation prepared by patient at home.

The screenshot displays the 'PREPARATION' screen in the PHIS system. At the top, there are navigation buttons: 'Record Prescription', 'Fill List', 'Print Original Prescription', and 'CP4'. Below this is a patient information section with fields for Mykad, Age (32 Years 09 Months 22 Days), Gender (Female), and MRN. There are also fields for Address, Phone And Email, Diagnosis, and No known Allergies. Physical attributes like Height (150 cm) and Weight (50 kg) are shown. A 'PHARMACY ORDER' section includes 'Supply Duration' (1 Day) and 'Next Collection Location' (Farmasi Bekalan Wad - Rx Filling). A toolbar contains various action buttons like 'PRESCRIPTION', 'ENGLISH', 'Invoice', 'Worksheet', 'Balance Medication Sheet', 'Patient sticker', 'Label', 'Full Supply', 'Allocate', and 'Prepare'. The main area is a table with columns: Drug Name, Order Detail, Order Qty, Reserve Qty, Dispense UOM Qty, Balance, Remarks, Drug Counselling, Prev Disp Qty, Extemporaneous, Prescriber Name, and Status. Three drugs are listed: Amlodipine 10 mg Tablet, Simvastatin 20 mg Tablet, and Atorvastatin 40 mg Tablet. The 'Extemporaneous' checkbox for the first drug is highlighted with a red circle and the number '1'.

Drug Name	Order Detail	Order Qty	Reserve Qty	Dispense UOM Qty	Balance	Remarks	Drug Counselling	Prev Disp Qty	Extemporaneous	Prescriber Name	Status
