Guideline setup IP Address for Thermal Printer Toshiba B-FV4T-GS

Prerequisite:

1. Toshiba B-FV4T-GS
2. USB cable
3. B-FV Setting Tools (software)
4. Setup must be performed in the Admin Account

Purpose:

To configure IP address setup at Toshiba B-FV4T-GS

Download:

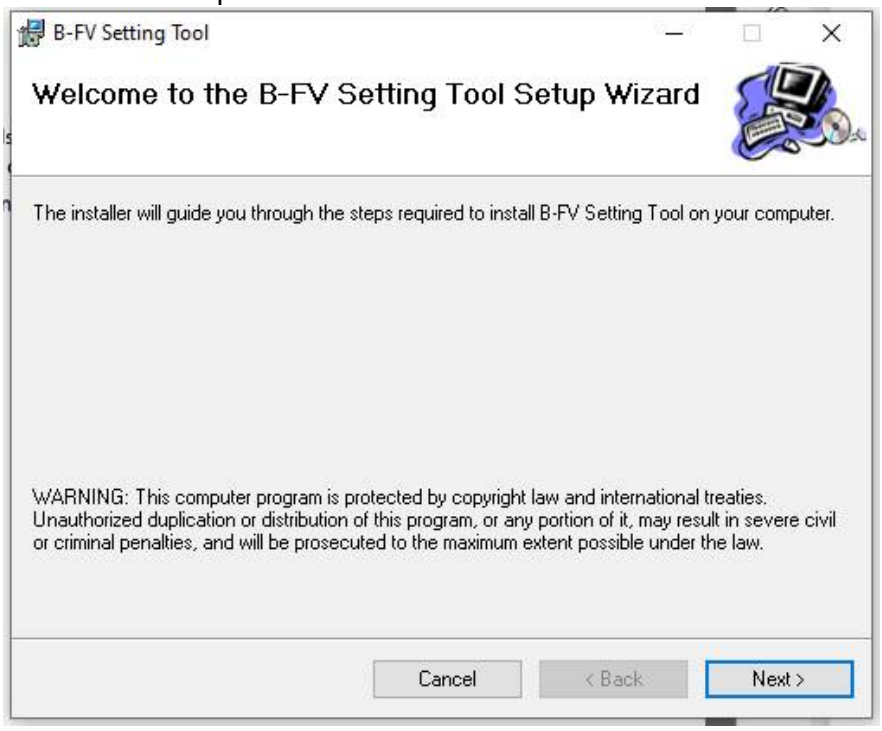
Please download B-FV Setting Tools or can find the installer at PhIS Admin account

https://www.toshibatec.com/download_overseas/printer/setting_tool/B-FV4_Series/

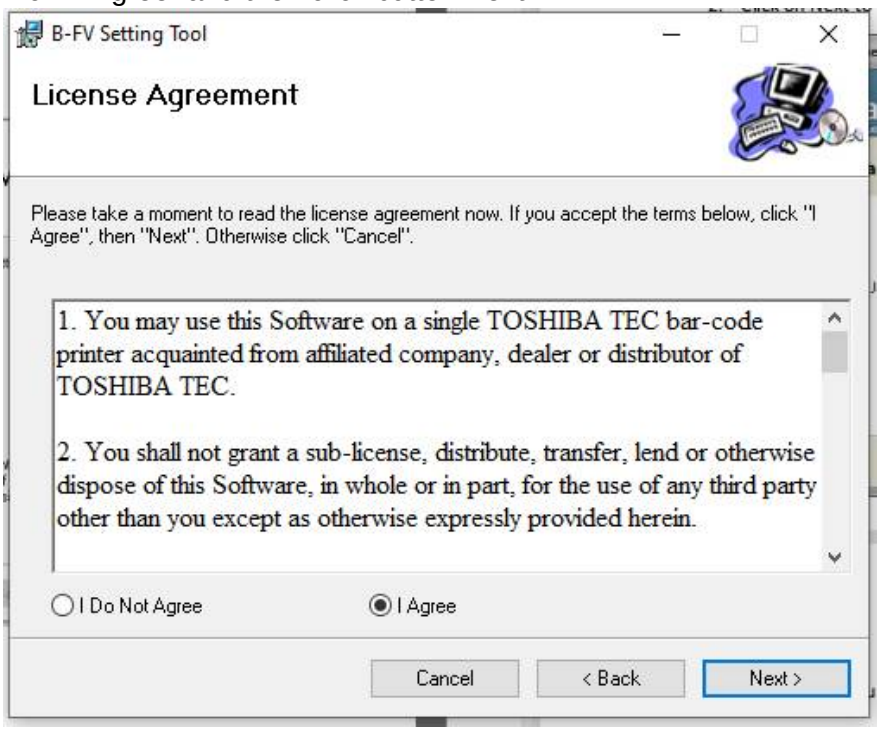
Installation:

1. Install B-FV Setting Tools
    - Double click on downloaded .msi files as shown below

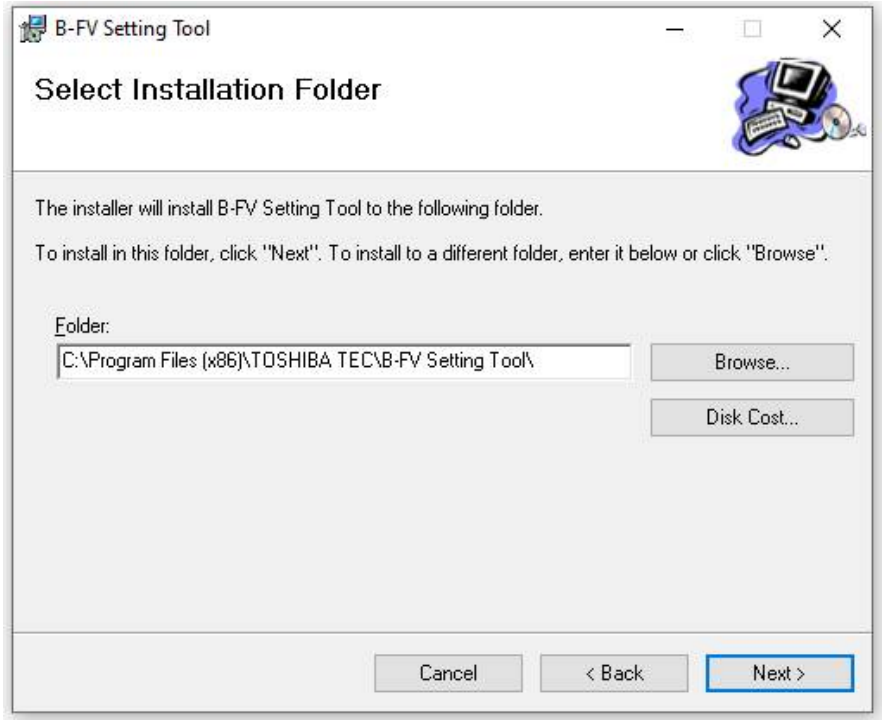
      
    - Click on Next to proceed with installation

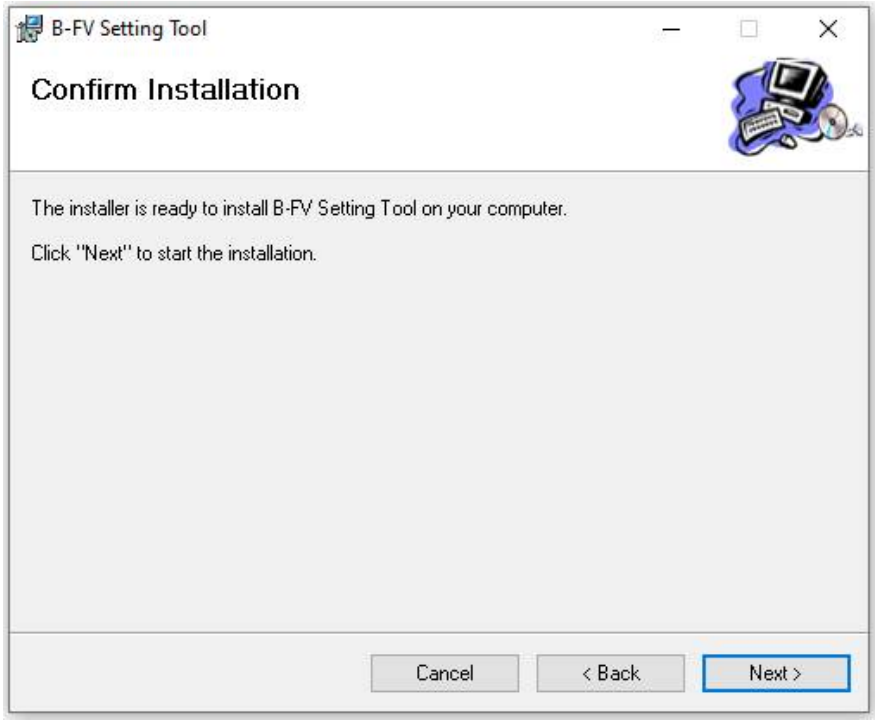
- Tick “I Agree” and then click button Next



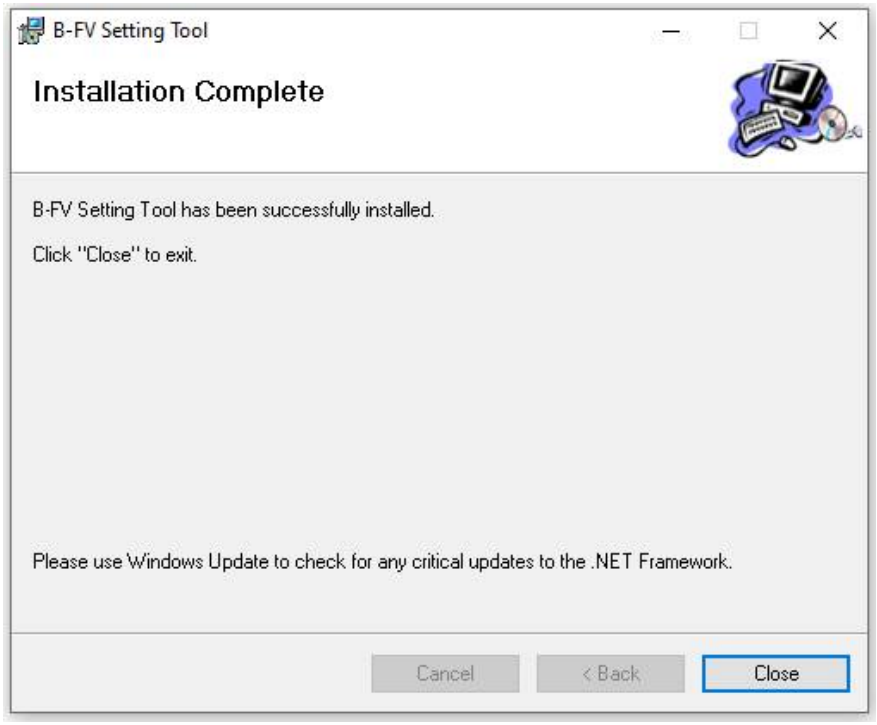
- Click button Next for installation folder



Click button Next to start installation



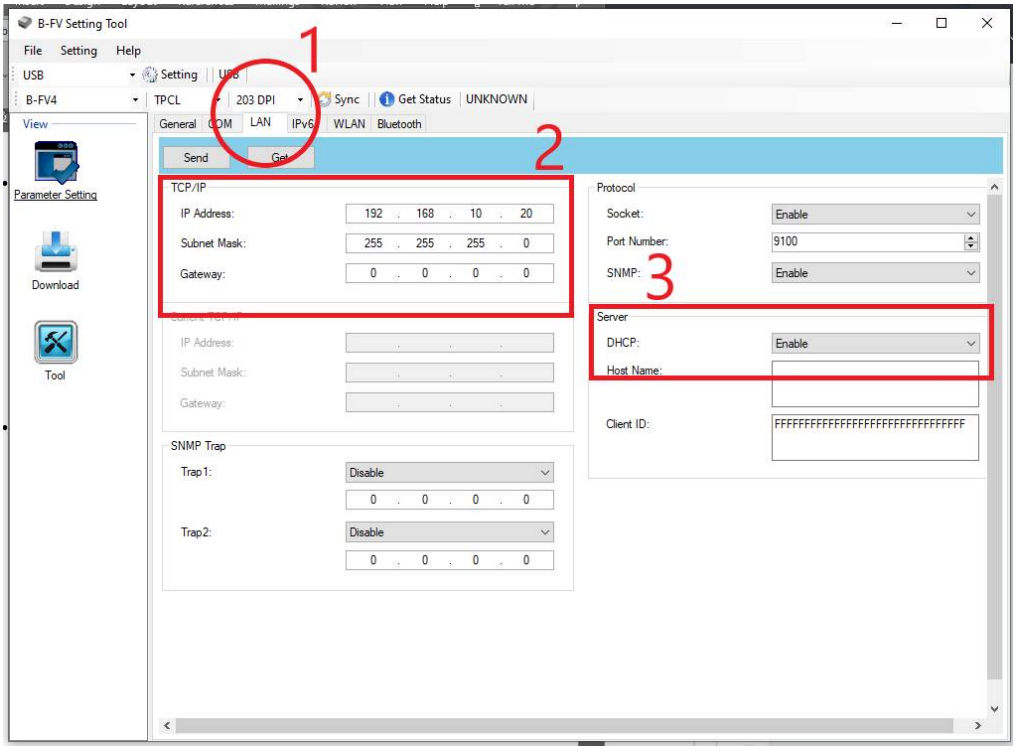
- Click Close button to complete the installation.



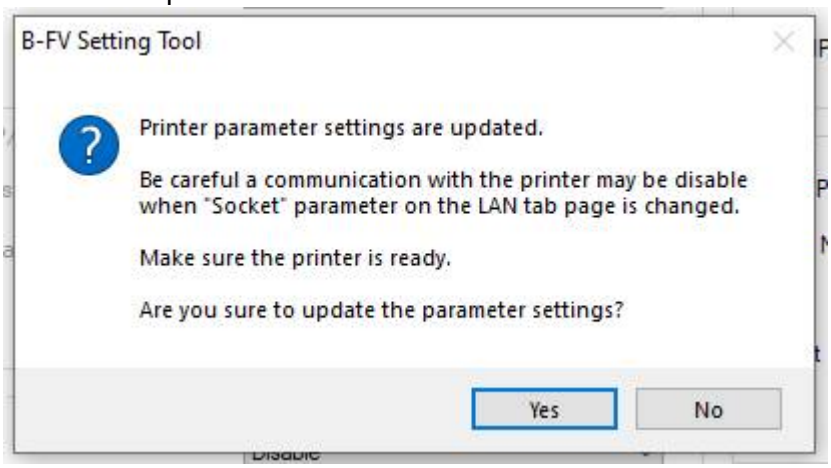
2. Run B-FV Setting Tool
    - Please connect Toshiba B-FV4T-GS printer with Computer using USB cable.
    - After finish install the tools, double click the icon B-FV Setting Tool at desktop.

    - Please select USB and click get status. Make sure the status is 'Online'.

    - Click at LAN tab, then set IP address, subnet mask, and gateway at TCP/IP part. Then set DHCP as disable. Click button Send after finish configure.



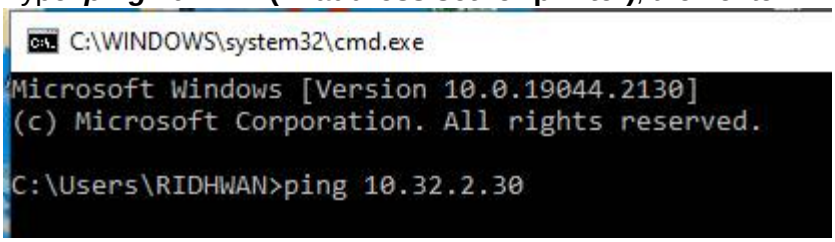
- Click Yes to proceed



Verify the connection:

To check whether the connection is up, test connection using command prompt.

Type: ***ping 10.x.x.x*** **(IP address set for printer)**, then enter



If get the reply, try test print at printer properties. If print test success, then the configuration IP for printer is successful.
