## 1. Introduction

Pharmaniaga Logistics Sdn. Bhd. executes software development, enhancement and maintenance projects for its clients. The term “project” is used to describe the full set of activities from the time the proposal is accepted and project initiation note or contract is signed to the time all the software and services are delivered according to the acceptance of the proposal/contract.

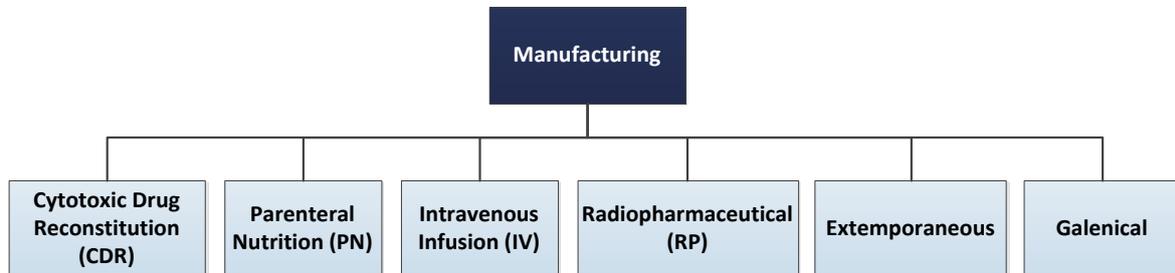

This process is to ensure both user requirements and software requirements of the projects developments are gathered appropriately from stakeholders and are documented in User Requirements Specification (URS) and System Design Documentation (SDD) specifically.

## 2. Purpose

The purpose of the document is to describe the purpose and functionality of the software product requested by client. This document outlines the project's details, requirements, interface, design issues, and components to ensure that each requirement has been met.

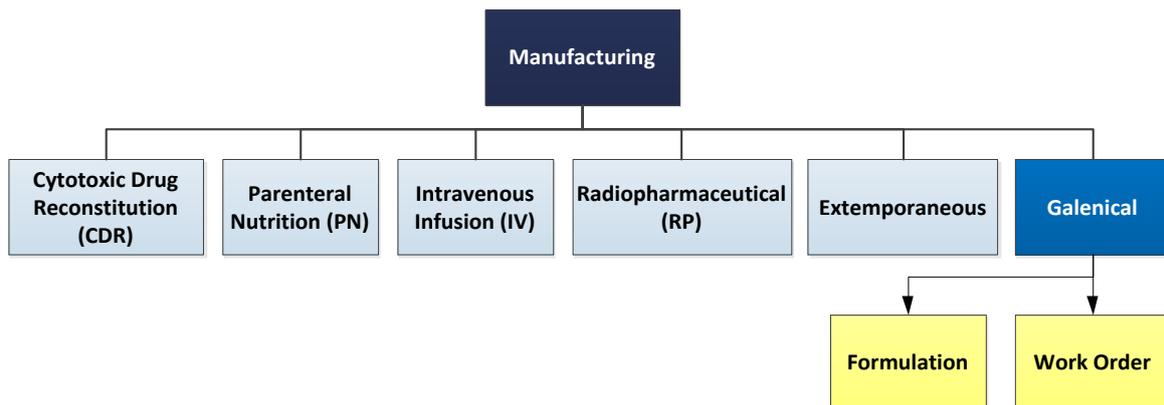

### 3. Detailed System Design

#### 3.1 Manufacturing Overview

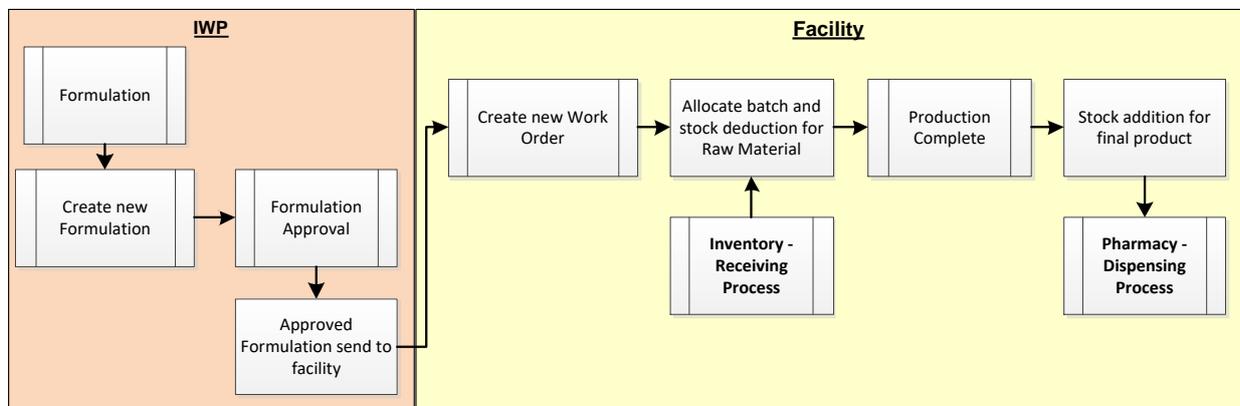

#### 3.2 Galenical

##### 3.2.1 Overview

##### 3.2.2 Block Diagram

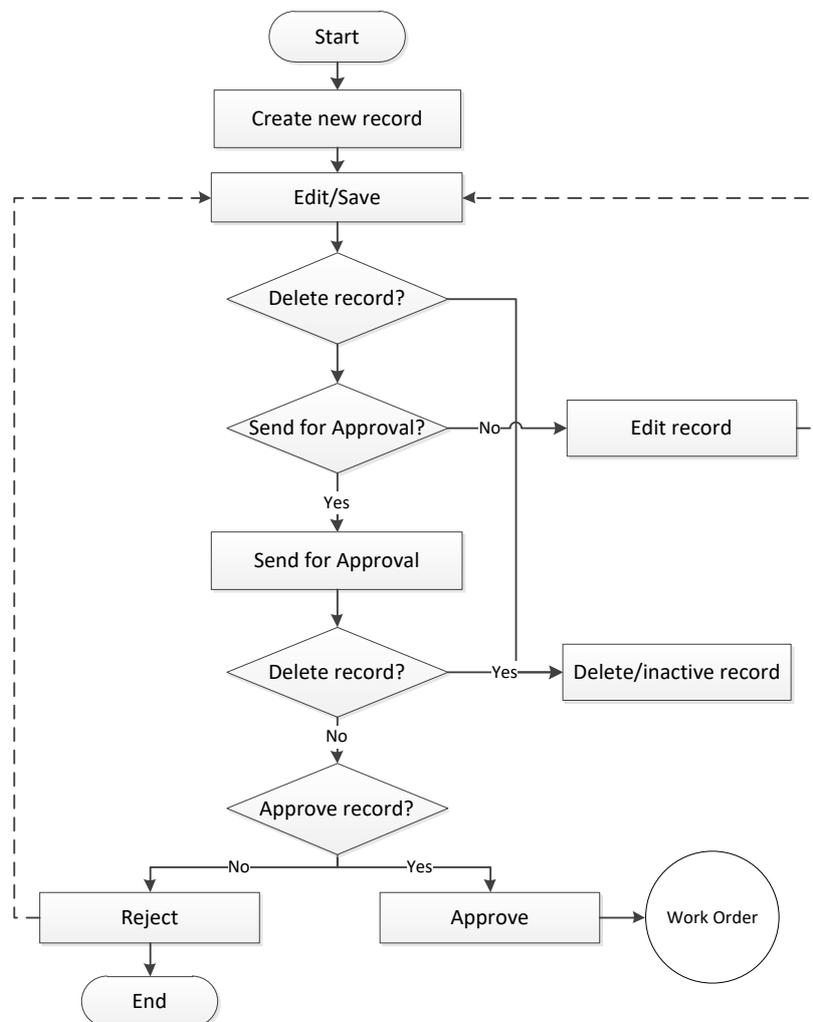

### 3.2.3 Formulation

Formulation screen is for HQ user to create new formula to manufacture products. The manufactured products must already exist as a new drug in Drug Master and new item in Item Master.

During creation of new Formulation record, user requires to enter the formulation product details including the materials and procedures involved. Only materials are mandatory for each formulation, procedures are not mandatory.

Each newly created formulation must be approved before the status updated to Active and will sync to other facilities for facility users to create new Work Order record. Facility users are not allowed to edit the HQ created Formulation. Any update or request for new formulation by each facility must be communicated with HQ.

##### 3.2.3.2.1.2 Application Business Rules

No.	Name	Description
1.	Search Transaction	<p>Click on the 'Search' button to search the existing record:</p> <ol style="list-style-type: none"> <li>If user enters multiple search criteria, system will display the search results based on the specified criteria</li> <li>If no criteria entered, system will display all transactions</li> <li>System will display the records that match any keyword entered regardless of the letter type (uppercase or lowercase).</li> </ol>

No.	Name	Description
2.	View search result in listing page	Columns in search result listing are displayed based on: <ol style="list-style-type: none"> <li>i. Formulary Type: Display 'Type' value based on transaction.</li> <li>ii. Formulary Code: Display 'Drug Code' value based on transaction.</li> <li>iii. Formulary Description: Display 'Drug Name' value based on transaction.</li> <li>iv. Formula Quantity: Display 'Quantity' value based on transaction.</li> <li>v. UOM: Display 'UOM' value based on transaction.</li> <li>vi. Version No: Display 'Formulation Version' value based on transaction.</li> <li>vii. Created Date: Display 'Date Created' value based on transaction.</li> <li>viii. Updated Date: Display 'Approved Date' value based on transaction.</li> <li>ix. Status: Display 'Status' value based on transaction.</li> </ol>
3.	Formulation Transaction	Double click on any record to view the record details.
4.	Create New Transaction	Click on the 'Create New Record (+)' button to create new transaction record.
5.	Refresh Listing	Click on the 'Refresh' button to reset all search criteria: <ol style="list-style-type: none"> <li>i. Formulary Code – Display as empty field</li> <li>ii. Formulary Description – Display as empty field</li> <li>iii. Status – All</li> <li>iv. Type – All</li> </ol> Search results will display all records based on above reset search criteria.
6.	User access	All user is allowed to view/create/edit/approve record however limited to the given user access role.

3.2.3.2.1.3 **Input Validation Rules**

No.	Name	Description	Mandatory	Format
1.	Formulary Code	User to enter Formulary Code (Drug Code). Search result will list all transaction based on the matching Formulary Code.	No	Text box
2.	Formulary Description	User to enter Formulary Description (Drug Name). Search result will list all transaction based on the matching Formulary Description.	No	Text box
3.	Status	Default to 'All' however user can select specific status: <ul style="list-style-type: none"> <li>• Active</li> </ul>	No	Drop down list

No.	Name	Description	Mandatory	Format
		<ul style="list-style-type: none"> <li>Inactive</li> <li>New</li> <li>Pending Approval</li> <li>Reject – On Hold</li> </ul> Values are displayed from Reference Codes maintenance screen with domain = 'GALENICAL_STATUS'.		
4.	Type	Default to 'All' however user can select specific status: <ul style="list-style-type: none"> <li>Manufacturing</li> <li>Repacking</li> </ul> Values are displayed from Reference Codes maintenance screen with domain = 'GALENICAL_TYPE'.	No	Drop down list

3.2.3.2.2.2 **Application Business Rules**

No.	Name	Description
1.	New Formulation record	Create new formulation record: i. User to fill in all required details. ii. Record status displayed as 'New' by default. iii. Able to add material details and procedures. iv. Mandatory to add material before save record. v. Not mandatory to add procedures before save record.
2.	Save record	On click of Save button: i. Record status remains as 'New'. ii. All fields are editable and able to add/update/delete materials or procedures. iii. Button 'Send for Approval' is displayed. iv. Button 'Delete/Inactive record' is displayed. v. Button 'Edit' is displayed, on click of 'Edit' button, screen is editable. vi. Button 'Add' is displayed, on click of 'Add' button, screen will clear and able to create new record.
3.	Delete/Inactive record	User able to delete/inactive record once already saved record and at all stage until record is approved. On delete record, mandatory to fill in 'Delete Reason' and status will update to 'Inactive'. On save 'Delete Reason', value will be displayed in the 'Remarks' field and all fields will display as read-only.
4.	Send for Approval	On click of 'Send for Approval' button: i. Record status updated to 'Pending Approval'. ii. All fields are editable. vii. Button 'Approve' is displayed. viii. Button 'Reject' is displayed. ix. Button 'Delete/Inactive record' is displayed. x. Button 'Edit' will display, on click of 'Edit' button, screen is editable. xi. Button 'Add' is displayed, on click of 'Add' button, screen will clear and able to create new record.
5.	Approve record	On click of 'Approve' button: i. Record status updated to 'Active'. ii. On click of 'Edit' button, able to edit: <ul style="list-style-type: none"><li>• Formulation Version</li><li>• Preparation Type</li><li>• Shelf Life</li><li>• Storage Condition</li><li>• Formulation Reference</li><li>• Remarks</li><li>• Procedures</li></ul> iii. Button 'Delete/Inactive record' is displayed.

No.	Name	Description
6.	Reject record	On click of 'Reject' button: <ol style="list-style-type: none"> <li>i. Record status updated to 'Reject-On Hold'.</li> <li>ii. Button 'Add' is displayed, on click of 'Add' button, screen will clear and able to create new record.</li> </ol>
7.	User access	All user is allowed to view/create/edit/approve record however limited to the given user access role.

3.2.3.2.2.3 **Input Validation Rules**

No.	Name	Description	Mandatory	Format
1.	Type	Able to select options as below: <ul style="list-style-type: none"> <li>• Manufacturing</li> <li>• Repacking</li> </ul> Values are displayed from Reference Codes maintenance screen with domain = 'GALENICAL_TYPE'. Selecting this value will only categorized the record into Manufacturing or Repacking record, no other function involved. Manufacturing is for records that manufacture new product and new item code, while Repacking is for records that only repack the item into new packaging but still requires new item code.	Yes	Drop down list
2.	Formulation Version	User to enter numeric value with maximum 2 integers with 2 decimals. Formulation version is entered for each formulation as multiple formulations are allowed for one item code. The entered version will be used to differentiate each formulation for the same item.	Yes	Text field
3.	Drug Code	Field will list all active Drug Code as per in Maintenance > Pharmacy > Drug screen. User able to search and select the drug code based on the Drug Description or/and Drug Code.	Yes	Searching field

No.	Name	Description	Mandatory	Format
4.	Status	<p>Record status according to action done by user:</p> <ul style="list-style-type: none"> <li>• Save – Status updated as ‘New’</li> <li>• Send for Approval – Status updated as ‘Pending Approval’</li> <li>• Delete record – Status updated as ‘Inactive’</li> <li>• Approve – Status updated as ‘Active’</li> <li>• Reject – Status updated as ‘Reject-On Hold’</li> </ul> <p>Values are displayed from Reference Codes maintenance screen with domain = ‘GALENICAL_STATUS’.</p>	No	Read-only
5.	Drug Name	Displayed based on the selected Drug Code.	No	Read-only
6.	Quantity/UOM	<p>User to enter the formulation quantity. Numeric value with maximum 9 characters including 2 decimals.</p> <p>UOM field will display the selected drug SKU UOM as per in Maintenance &gt; Pharmacy &gt; Drug screen.</p>	Yes	Text field
7.	Preparation Type	<p>Able to select options as below:</p> <ul style="list-style-type: none"> <li>• Non Sterile External</li> <li>• Non Sterile Internal</li> <li>• Sterile – CDR</li> <li>• Sterile – IV</li> <li>• Sterile – Others</li> <li>• Sterile – PN</li> </ul> <p>Values are displayed from Reference Codes maintenance screen with domain = ‘GALENICAL_PREP_TYPE’.</p>	Yes	Drop down list
8.	Package Size	<p>User to enter the pack size. Numeric value with maximum 9 characters including 2 decimals.</p> <p>UOM drop down list will display all active records from UOM maintenance screen.</p>	Yes	Text field
9.	Shelf Life	<p>User to enter the shelf life. Integer value only with maximum 9 characters.</p> <p>For UOM drop down list, able to select options as below:</p> <ul style="list-style-type: none"> <li>• Days</li> <li>• Months</li> <li>• Weeks</li> </ul> <p>Values are displayed from Reference Codes maintenance screen with domain = ‘DURATION’.</p>	Yes	Text field

No.	Name	Description	Mandatory	Format
10.	Storage Condition	Value displayed in checkboxes, able to select options as below: <ul style="list-style-type: none"> <li>▪ Below 0 °C</li> <li>▪ Protect from Light</li> <li>▪ Refrigerate (2 - 8 °C)</li> <li>▪ Room Temperature (&lt; 25 °C)</li> </ul> Values are displayed from Reference Codes maintenance screen with domain = 'STORAGE_CONDITION'.	No	Checkbox
11.	Date Created	Displayed based on the record created date. Format: dd/mm/yyyy	No	Text field
12.	Created By	User who created/saved the record. Displayed based on user's first name and last name from Maintenance>HQ Security>User Profile.	No	Text field
13.	Approved Date	Displayed based on the record approved date. Format: dd/mm/yyyy	No	Text field
14.	Approved By	User who approve the record. Displayed based on user's first name and last name from Maintenance>Security>User Profile.	No	Text field
15.	Formulation Reference	User to enter free text value with maximum 300 characters.	No	Text field
16.	Remarks	User to enter free text value with maximum 100 characters.	No	Text field
<b>Add Material</b>				
17.	Seq. No	Display the record sequence number. Field is auto-populated by system and is read only.	No	Read-only
18.	Type of Material	Able to select options as below: <ul style="list-style-type: none"> <li>▪ Consumable</li> <li>▪ Ingredients</li> </ul> Values are displayed from Reference Codes maintenance screen with domain = 'MATERIAL_TYPE'.	Yes	Drop down list
19.	Remarks	User to enter free text value with maximum 100 characters.	No	Text field
20.	Item Code	Field will list all active Item Code as per in Maintenance > Inventory > Item Master screen. User able to search and select the item code based on the Item Description or/and Item Code.	Yes	Searching field
21.	Item Description	Displayed based on the selected Item Code.	No	Read-only

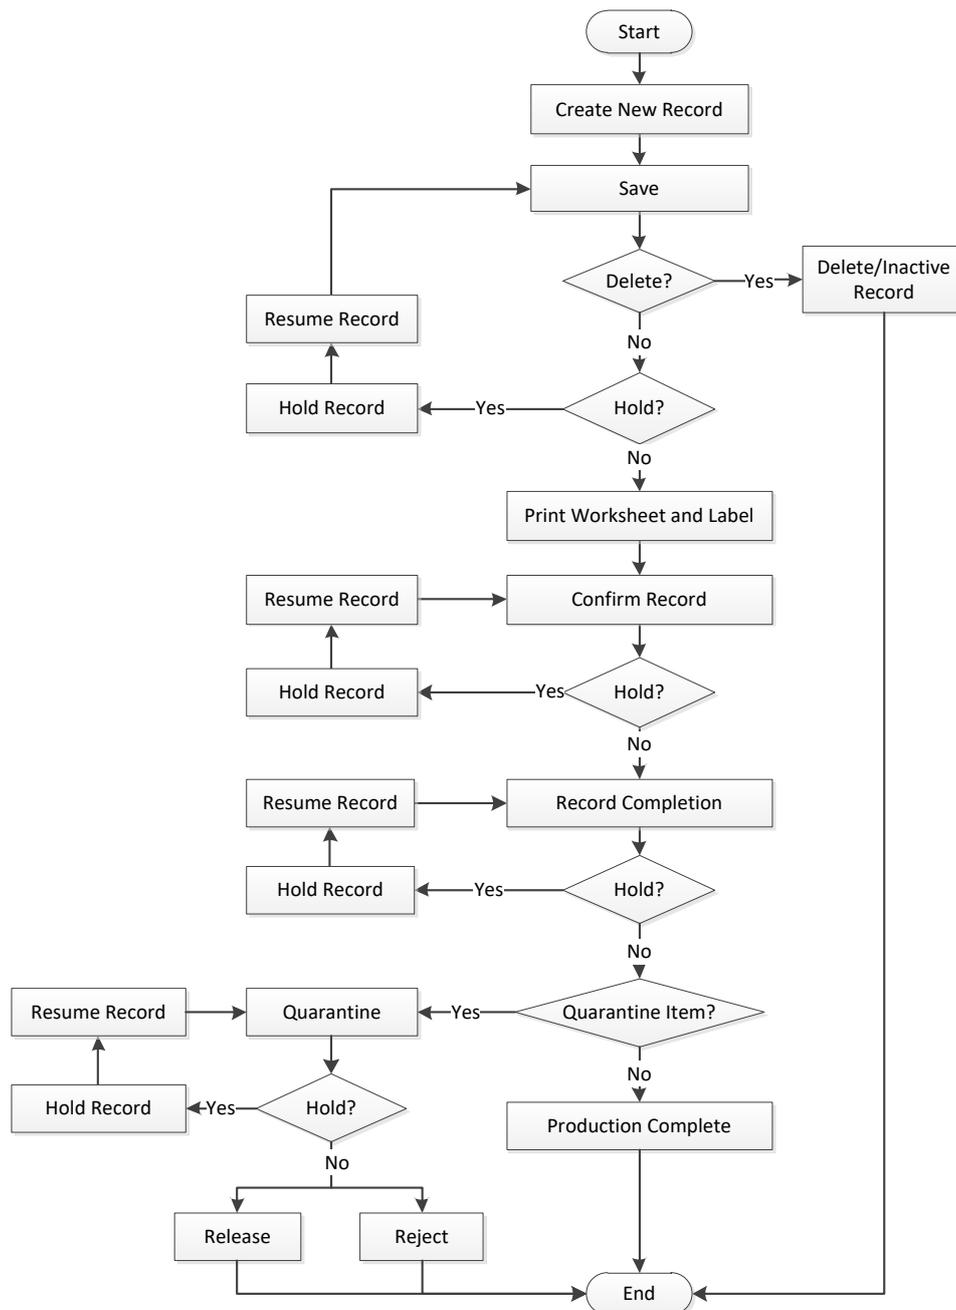

No.	Name	Description	Mandatory	Format
22.	Quantity/UOM	User to enter the formulation quantity. Numeric value with maximum 9 characters including 2 decimals.  UOM field will display the selected drug SKU UOM as per in Maintenance > Pharmacy > Drug screen.	Yes	Text field
23.	Description Suffix	User to enter free text value with maximum 50 characters. Field value will be used as additional description for material item, For example:  Description suffix: q.s  Drug Name: Syrup BP / Simple Syrup  Material Description will be displayed as,  Syrup BP / Simple Syrup (q.s)	No	Text field
<b>Add Procedures</b>				
24.	Seq. No	Display the record sequence number. Field is auto-populated by system and is read only.	No	Read-only
25.	Process Instruction	User to enter free text value with maximum 100 characters.	No	Text field

### 3.2.4 Work Order

Work order screen is for facility users to create record for production of new item based on the formulation received by HQ and able to print label and worksheet. Once production complete, raw materials stock will be deducted and final product stock quantity will increase in user's current login unit. The final product stock quantity will then able to be allocated in other dispensing modules for dispensing to patients.

No.	Name	Description
		<p>If batch record already exists, system will update the available quantity, but if record is not exist, to create new stock in the current user's unit.</p> <p>vii. Same validation need to check for the Pharmacy Store. If record already exists in Pharmacy Store, no need to update but if record is not exist, need to create new stock with available quantity as 0.</p> <p>viii. Condition to create new stock, the item brand for the formulary item must contain MOH as one of the item brand.</p>
10.	Quarantine	User is able to Quarantine record before Production Complete. On selection of the Quarantine checkbox, record status will update to 'Quarantine'. On save record, button 'Reject' and 'Release' are displayed.
11.	Release record	On click of 'Release' button, record status will update to 'Released' and stock available quantity for the final product will increase based on the value specified in the Quantity/UOM field.
12.	Reject record	On click of 'Reject' button, record status will update to 'Rejected', however no stock addition for the final product.
13.	User access	All user is allowed to view/create/edit/confirm/production complete record however limited to the given user access role.

3.2.4.2.2.3 **Input Validation Rules**

No.	Name	Description	Mandatory	Format
1.	Unit Code	Value displayed based on the user's requester unit code as setup in Maintenance > Security > User Profile screen.	No	Read-only
2.	Request Status	<p>Record status according to action done by user:</p> <ul style="list-style-type: none"> <li>• Save – Status updated as 'New'</li> <li>• Confirm – Status updated as 'Worksheet/Labels Generated'</li> <li>• Record Completion – Status updated as 'In Progress'</li> <li>• Production Complete – Status updated as 'Completed'</li> <li>• Release – Status updated as 'Released'</li> <li>• Reject – Status updated as 'Rejected'</li> <li>• Hold – Status updated as 'On Hold'</li> </ul> <p>Values are displayed from Reference Codes maintenance screen with domain = 'GALENICAL_WO_STATUS'.</p>	No	Read-only
3.	Type	This field will display record populated based on the selected formulation. Value displayed is either 'Manufacturing' or 'Repacking' based on the Reference	No	Read-only

No.	Name	Description	Mandatory	Format
		Codes maintenance screen with domain = 'GALENICAL_TYPE'.		
4.	Work Order No	Value is auto-generated by system for each record after user saves the work order record based on the format as below: Current Year-Current Month-Running Number Example: 18-06-0001 The running number is up to 4 integer values and should reset monthly. Each month should generate the running number separately.	No	Read-only
5.	Formulary Drug Name	Field will list all active Formulation Drug Code as per in Formulation screen. Value is displayed based on the conditions below: i. Formulation drug record as retrieved from IWP where record status is 'Active'. ii. Drug is 'Active' in user's unit catalogue (Unit level 2 and 3 only) and 'Active' in Drug/Non-Drug Catalogue (All unit levels).	Yes	Searching field
6.	Formulation Version	Value is auto-populated based on the selected formulary drug code.	No	Read-only
7.	Item Description	Field will list all 'Active' item code based on the selected Formulary Drug Name where item is specified as 'Manufactured Item' in Maintenance > Inventory > Item Master screen.	Yes	Searching field
8.	Request Quantity	Value is default based on the selected formulation. User is allowed to edit the quantity. This request quantity value will be the default value for 'Produced Quantity' field (round up to next integer).  This field is numeric only with up to 2 decimal values.	Yes	Text field
9.	Request Quantity UOM	Value is default based on the Quantity UOM of the selected formulation.	No	Read-only
10.	Preparation Type	Field will display value based on the selected formulation. Values displayed are: <ul style="list-style-type: none"> <li>• Non Sterile External</li> <li>• Non Sterile Internal</li> <li>• Sterile – CDR</li> <li>• Sterile – IV</li> <li>• Sterile – Others</li> <li>• Sterile – PN</li> </ul> Values are displayed from Reference Codes maintenance screen with domain = 'GALENICAL_PREP_TYPE'.	No	Read-only
11.	Pack Size	Value is default based on the selected formulation. User	Yes	Text field

No.	Name	Description	Mandatory	Format
		is allowed to edit the pack size where value is referring to the final product packaging size. This field is numeric only with up to 2 decimal values.		
12.	Pack Size UOM	Value is default based on the Pack Size UOM of the selected formulation.	No	Read-only
13.	Shelf Life	Value is default based on the selected formulation. User is allowed to edit the default shelf life value. This field value will be used to generate the final product expiry date. This field is integer value only with maximum 9 characters.	Yes	Text field
14.	Shelf Life UOM	Display default value based on the selected formulation. User can edit the value. Able to select options as below: <ul style="list-style-type: none"> <li>• Days</li> <li>• Months</li> <li>• Weeks</li> </ul> Values are displayed from Reference Codes maintenance screen with domain = 'DURATION'.	No	Read-only
15.	Remarks	User to enter free text value with maximum 100 characters.	No	Text field
16.	Storage Condition	Display value based on the selected formulation where value is setup based on the Reference Codes maintenance screen where domain = 'STORAGE_CONDITION'. Values are: <ul style="list-style-type: none"> <li>• Below 0 °C</li> <li>• Protect from Light</li> <li>• Refrigerate (2 - 8 °C)</li> <li>• Room Temperature (&lt; 25 °C).</li> </ul>	No	Read-only
17.	Request Reference	User to enter free text value with maximum 300 characters.	No	Text field
18.	Request Date	Displayed by default based on the record created date. Format: dd/mm/yyyy User able to edit the value.	Yes	Calendar
19.	Quantity Produced	Field is displayed when status = 'In Progress' only. Value is default based on the value entered in 'Request Quantity' field (round up to next integer for decimal value). User is allowed to edit the quantity. Value will impact	Yes	Text field
20.	Quantity Produced UOM	Field is displayed when status = 'In Progress' only. Displayed based on the selected drug SKU UOM as per in Maintenance > Pharmacy > Drug screen.	No	Read-only
21.	Yield %	Field is displayed when status = 'In Progress' only. Auto calculated value which shows the difference	No	Read-only

No.	Name	Description	Mandatory	Format
		between the 'Request Quantity' and 'Quantity Produced' field values and is auto-calculated based on the calculation below: $\frac{[(\text{Quantity Produced} - \text{Request Quantity}) / \text{Quantity/UOM}] * 100\%}{}$ Display negative value if got negative value.		
22.	Batch No.	Field is displayed when status = 'In Progress' only. Batch No is auto-generated by system based on the format as below: Unit Code-DDMMYY-Running number. Example: MANF-140618-1. <ul style="list-style-type: none"> <li>Unit Code is restricted up to 4 first characters only.</li> <li>Date refers to 'Request Date' value.</li> <li>Running number is auto reset by system scheduler on daily basis.</li> </ul>	No	Read-only
23.	Expiry Date	Field is displayed when status = 'In Progress' only. By default value is generated based on the shelf life value but editable by user.	Yes	Calendar
24.	Quarantine Required	Field is displayed when status = 'In Progress' only. 'Quarantine Required' checkbox is to be selected if user need to quarantine the produced product. Selecting the Quarantine checkbox will update the record status to Quarantine.	No	Checkbox
25.	Prepared By	Field is displayed when status = 'In Progress' only. User name that prepare the record. User to enter free text value with maximum 300 characters.	No	Text field
26.	Approved By	Field is displayed when status = 'In Progress' only. User name that approve the record. User to enter free text value with maximum 300 characters.	No	Text field
27.	Rejected By	Field is displayed when status = 'Rejected' only. User who rejected the quarantine record. Displayed based on user's first name and last name from Maintenance>HQ Security>User Profile.	No	Read-only
28.	Reject Reason	Field is displayed when status = 'Rejected' only. Field is displayed on click of 'Reject' button and user to enter free text value with maximum 100 characters.	Yes	Text field
<b>Material Section</b>				
29.	Seq. No	Display the record sequence number. Field is auto-populated by system and is read only.	No	Read-only
30.	Item Code and Description	Item Code and Description will display the item details based on the selected formulation. Description suffix will	No	Read-only

No.	Name	Description	Mandatory	Format
		<p>be displayed with the item description (if any).            For example:            Description suffix = q.s            Drug Name = Syrup BP / Simple Syrup            Material Description will be displayed as,            Syrup BP / Simple Syrup (q.s)</p>		
31.	Quantity	<p>Quantity is displayed by default based on the selected formulation. Value is auto-update once user change the value for Quantity or Pack Size based on the calculation as below:</p> <ol style="list-style-type: none"> <li>i. When Quantity UOM = Pack Size UOM              Material Qty =  <math>(WO Qty * FO Material Qty) / FO Qty</math></li> <li>ii. When Quantity UOM <math>\neq</math> Pack Size UOM              Material Qty =  <math>[(WO Pack Size * FO Material Qty) / FO Pack Size] * [WO Qty / FO Qty]</math></li> </ol> <p>WO – Work Order            FO – Formulation            Value is auto-calculated and not editable.            Quantity UOM is displayed based on the setup in Formulation which refers to the Material Item Quantity UOM from Drug Master.</p>	No	Read-only
32.	Allocate Quantity	<p>On click of 'Allocate Quantity' hyperlink after save record and before confirms record, screen Item Batch is displayed. Item Batch listed based on all batches with available quantity (after minus reserved quantity) and for all items belongs to the same drug of the raw material.</p> <p>On manual allocation, system will auto default the Allocate Quantity value based on the first expiry first out method.</p> <p>Only one batch number is allowed to be allocated per each raw material and value must be the same with value in 'Quantity' column. User can also de-allocate the batch by saving the allocated quantity as 0.</p> <p>Value will be displayed based on the calculation as below:</p> <ul style="list-style-type: none"> <li>• Material Quantity / Conversion Factor from Drug Master for the Material Item and round up to the next integer. Value is not editable; user can only update the allocated batch.</li> <li>• Allocate Quantity UOM is displayed based on the setup in Formulation which refers to the Material Item SKU UOM from Drug Master.</li> </ul>	No	Read-only

No.	Name	Description	Mandatory	Format
33.	Batch No	Batch Number is displayed based on the selected batch in the Item Batch Details screen. User is allowed to only select one batch for each Material Item as per the GMP (Good Manufacturing Practice) standard.	No	Read-only
34.	Expiry Date	Display Expiry Date value based on the allocated batch in Item Batch details screen.	No	Read-only
<b>Add Procedures</b>				
35.	Seq. No	Display the record sequence number. Field is auto-populated by system and is read only.	No	Read-only
36.	Process Instruction	Display the procedures as per entered in the selected Formulation record.	No	Read-only

- Click on 'Worksheet' button to view and print worksheet.

**Cross References**

3.2.4.2.3.2 **Application Business Rules**

No.	Name	Description
1.	Generate worksheet before Confirm record.	After saving the work order record, when record status is New, click on the Worksheet button and user will be able to view and print the draft Worksheet. Worksheet will be displayed as draft due to record is not yet confirmed, only for the purpose of verifying the worksheet before confirming the record. Value for 'Qty Prepared', 'Prepared By' and 'Approved By' are empty due to value will only be available when the record status is Completed.
2.	Generate worksheet after Complete or Release record.	When record status is Completed or Released, click on the Worksheet button and user will be able to view and print the final Worksheet where 'Qty Prepared', 'Prepared By' and 'Approved By' fields updated as per the value as entered on the work order screen.

No.	Name	Description
3.	Request Date	Value displayed based on 'Request Date' field on the work order screen.
4.	Worksheet ID	Field value is auto-generated as displayed in 'Work Order No' field on the work order screen.
5.	Request Qty	Display value based on the 'Request Quantity' field as entered on the work order screen.
6.	Shelf Life	Display value based on the 'Shelf Life' field as entered on the work order screen.
7.	Pack Size	Display value based on the 'Pack Size' field as entered on the work order screen.
8.	Qty Prepared	Display value based on the 'Quantity Prepared' field as entered on the work order screen.
9.	Preparation Type	Display value based on 'Preparation Type' field on the work order screen.
10.	Item Description	Display value based on 'Item Description' field on the work order screen.
11.	Batch No	Display value based on 'Batch No' field on the work order header screen.
12.	Expiry Date	Display value based on 'Expiry Date' field on the work order header screen.
13.	Ingredients/ Consumables	Display the Item Description for each material item. Display item under 'Ingredients' section if Item Group = Drug. Display item under 'Consumables' section if Item Group = Non-Drug.
14.	Vol. per Qty.	Value is displayed based on the calculation record: i. When Quantity UOM = Pack Size UOM Vol per Qty = $(WO\ Pack\ Size * WO\ Material\ Qty) / WO\ Qty$ ii. When Quantity UOM $\neq$ Pack Size UOM Vol per Qty = $WO\ Material\ Qty / WO\ Qty$ WO is Work Order and UOM is displayed based on the Material Qty UOM.
15.	Total Qty	Value is displayed based on the 'Quantity' column as displayed in the material section on work order screen.
16.	Expiry Date	Display the 'Expiry Date' based on the allocated batch for each material item.
17.	Batch ID	Display the 'Batch No.' based on the allocated batch for each material item.
18.	Allocated Qty	Display the 'Allocated Quantity' based on the allocated batch for each material item.
19.	Procedure	Display the procedures entered in the Procedures section on the work order screen.
20.	Storage	Display value based on 'Storage Condition' field on the work order header screen.
21.	Label	This column is empty for user to paste the printed label on the worksheet.

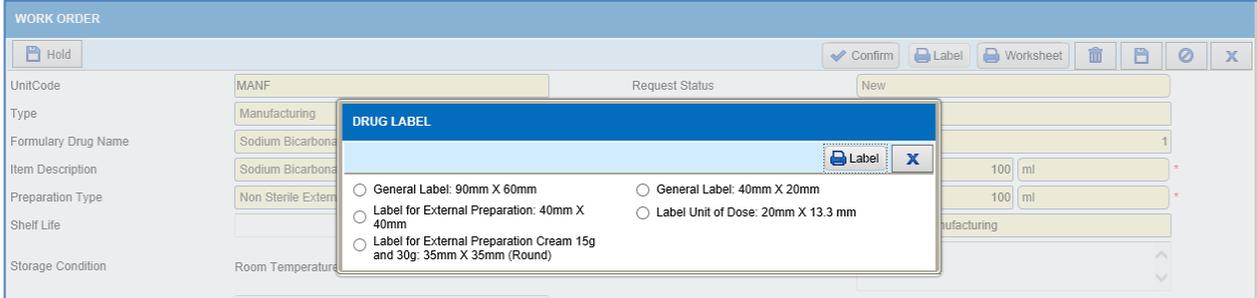

No.	Name	Description
22.	Reference	Display value based on the 'Request Reference' value as displayed on the work order screen.
23.	Worksheet Generated By	Worksheet Prepared By. Display the user first name and last name as displayed in 'Request By' field on the work order screen.
24.	Prepared By	Manually filled in by user.
25.	Approved By	Manually filled in by user.

vii. PN Label: Options

The screenshot displays a software interface for PN Label options. A dialog box titled "PN LABEL" is centered on the screen. It contains two radio button options: "PN Paed Std Soln" and "Lipid Standard". To the right of these options is a "Label" button with a printer icon and an "X" button. The background interface shows a table with columns for "Request Status", "Worksheet Prepared By", and "Remarks". The "Request Status" column contains the value "New". The "Worksheet Prepared By" column contains the value "Pharmacist PN". The "Remarks" column is empty. The table also shows some numerical values like "18-06-0007", "1", and "100".

<b>PN Paed Std Soln</b>		
8.	Drug Name	Display based on the 'Formulary Drug Name' in work order header screen.
9.	Total Volume	Display based on the 'Pack Size' in work order header screen and UOM is hardcoded to mL/bag.
10.	Protein	Display based on the drug name for the formulary item: In TPN Source Content screen, (Amino acid / Volume) * Work Order Pack Size UOM hardcoded to 'g'.
11.	Dextrose	Display based on the drug name for the formulary item: In TPN Source Content screen, (Glucose / Volume) * Work Order Pack Size UOM hardcoded to 'g'.

No.	Name	Description
12.	Sodium	Display based on the drug name for the formulary item: In TPN Source Content screen, (Sodium / Volume) * Work Order Pack Size UOM hardcoded to 'mmol'.
13.	Potassium	Display based on the drug name for the formulary item: In TPN Source Content screen, (Potassium / Volume) * Work Order Pack Size UOM hardcoded to 'mmol'.
14.	Calcium	Display based on the drug name for the formulary item: In TPN Source Content screen, (Calcium / Volume) * Work Order Pack Size UOM hardcoded to 'mmol'.
15.	Magnesium	Display based on the drug name for the formulary item: In TPN Source Content screen, (Magnesium / Volume) * Work Order Pack Size UOM hardcoded to 'mmol'.
16.	Phosphate	Display based on the drug name for the formulary item: In TPN Source Content screen, (Phosphate / Volume) * Work Order Pack Size UOM hardcoded to 'mmol'.
17.	Chloride	Display based on the drug name for the formulary item: In TPN Source Content screen, (Chloride / Volume) * Work Order Pack Size UOM hardcoded to 'mmol'.
18.	Acetate	Display based on the drug name for the formulary item: In TPN Source Content screen, (Acetate / Volume) * Work Order Pack Size UOM hardcoded to 'mmol'.
19.	Trace Element	Display based on the drug name for the formulary item: In TPN Source Content screen, (Trace Element / Volume) * Work Order Pack Size UOM hardcoded to 'ml'.
20.	Calories	Display based on the drug name for the formulary item: In TPN Source Content screen, (Total Energy / Volume) * Work Order Pack Size UOM hardcoded to 'kCal'.
21.	Osmolarity	Display calculated value based on each material item: In PPN Source Content screen, Osmolarity (Sum of all material items) = (Material Quantity / Work Order Header: Request Quantity) * 1000] * (PPN Source Content: Osmolarity) UOM hardcoded to 'mOsm/L'.
22.	Batch No	Display based on the 'Batch No' in work order header screen.
23.	Expiry Date	Display based on the 'Expiry Date' in work order header screen.

No.	Name	Description
<b>Lipid Standard</b>		
24.	Drug Name	Display based on the 'Formulary Drug Name' in work order header screen.
25.	Lipid Soln	Display value from material quantity for material item. Material item should be based on Drug Master, PN Type = PPN and in PPN Source Content the drug is identified as Lipid. UOM is hardcoded to mL.
26.	Vitalipid	Display value from material quantity for material item. Material item should be based on Drug Master, PN Type = PPN and in PPN Source Content the drug is identified as Fat Soluble. UOM is hardcoded to mL.
27.	Soluvit	Display value from material quantity for material item. Material item should be based on Drug Master, PN Type = PPN and in PPN Source Content the drug is identified as Water Soluble. UOM is hardcoded to mL.
28.	Total Vol	Value is calculated based on the addition of all values in 'Lipid Soln', 'Vitalipid' and 'Soluvit' column.
29.	Batch No	Display based on the 'Batch No' in work order header screen.
30.	Worksheet ID	Display based on the 'Work Order No' in work order header screen.
31.	Date Prepared	Display based on the 'Request Date' in work order header screen.
32.	Expiry Date	Display based on the 'Expiry Date' in work order header screen.
33.	Price (RM)	No value for 'Price'. Field is left empty for user to manually fill in.
34.	Storage	Hardcoded to '(6 days at 2-8°C & 1 day at 25°C)

3.2.4.2.5.2 Application Business Rules

No.	Name	Description
1.	Alternate Item condition	<p>'Alternate Item' menu is enabled when:</p> <ol style="list-style-type: none"> <li>i. Work Order type is 'Manufacturing'.</li> <li>ii. Material Item Type is Ingredients. Alternate is only for drug material item.</li> <li>iii. Work Order record status is New.</li> </ol> <p>Alternate Item screen can be viewed only when the value in 'Allocate Quantity' column is 0. System will display alert message if value is not 0 and user is requires to edit the allocate quantity value.</p> <p>System will list the alternate items for the material item based on the condition as below:</p> <ol style="list-style-type: none"> <li>i. Material Item has Strength and Strength UOM value in Drug Master; List will display Item where in Drug Master,               <ul style="list-style-type: none"> <li>- Same Active Ingredient</li> <li>- Same Strength and Strength UOM</li> </ul>               User can only alternate with item that has the same active ingredient and strength as the ordered material item.             </li> <li>ii. Material Item Strength value is 0; List will display Item where in Drug Master,               <ul style="list-style-type: none"> <li>- Same Active Ingredient</li> </ul> </li> </ol>

No.	Name	Description
		<p>- Same Quantity UOM (Not necessarily same Quantity value) User can alternate with the same active ingredient and quantity UOM as the ordered material item.</p> <p>User is allowed to allocate for one alternate item and one batch only for each material item.</p>
2.	Save Alternate Item record	<p>On click of the save button:</p> <p>i. System will save the alternate allocate quantity and display the alternate item as a second row below the original material item. 'Batch number' and 'Expiry Date' will display based on the allocation in the Alternate Item screen.</p> <p>ii. User is not allowed to do allocation for the original material item. System will display alert message if user try to allocate the quantity for the original item where user need to update the allocation for alternate to 0 before allocate the original item quantity.</p>

#### 3.2.4.2.5.3 Input Validation Rules

No.	Name	Description	Mandatory	Format
1.	Alternate Item Name	<p>Drop down will list the alternate items for the material item based on the condition as below:</p> <p>i. Material Item has Strength and Strength UOM value in Drug Master; List will display Item where in Drug Master, - Same Active Ingredient - Same Strength and Strength UOM</p> <p>ii. Material Item Strength value is 0; List will display Item where in Drug Master, - Same Active Ingredient - Same Quantity UOM (Not necessarily same Quantity value)</p> <p>This field is mandatory.</p>	No	Drop down list
2.	Allocation Qty	<p>Once user selects value in Alternate Item drop down, allocate quantity value is default based on the calculation below:</p> <ul style="list-style-type: none"> <li>Material Quantity / Conversion Factor from Drug Master for the Alternate Item</li> <li>Allocation is default to the first expiry batch number.</li> <li>User is allowed to change the batch with condition that the quantity should still be the same and only one batch can be allocated for each material. User can also de-allocate the batch by saving the allocated quantity as 0.</li> <li>User to key in only integer value.</li> </ul>	No	Text field
