## 1. Introduction

Pharmaniaga Logistics Sdn. Bhd. executes software development, enhancement and maintenance projects for its clients. The term “project” is used to describe the full set of activities from the time the proposal is accepted and project initiation note or contract is signed to the time all the software and services are delivered according to the acceptance of the proposal/contract.

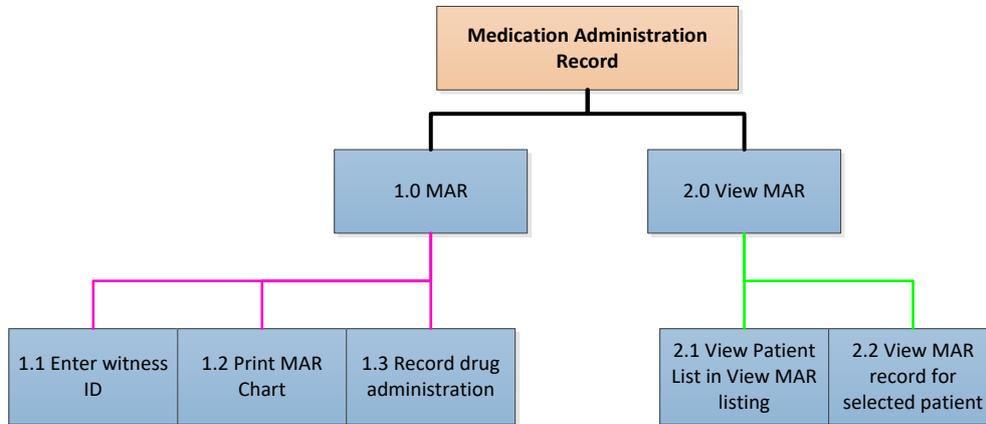

This process is to ensure both user requirements and software requirements of the projects developments are gathered appropriately from stakeholders and are documented in User Requirements Specification (URS) and System Design Documentation (SDD) specifically.

## 2. Purpose

The purpose of the document is to describe the purpose and functionality of the software product requested by client. This document outlines the project's details, requirements, interface, design issues, and components to ensure that each requirement has been met.

### 3. Detailed System Design

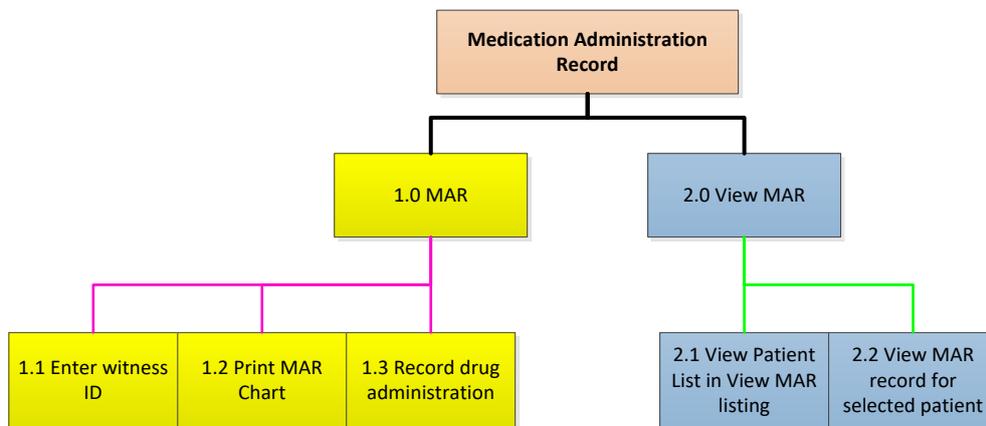

#### 3.1 Medication Administration Recording (MAR) Overview

MAR.OVW1: MAR Overall Overview

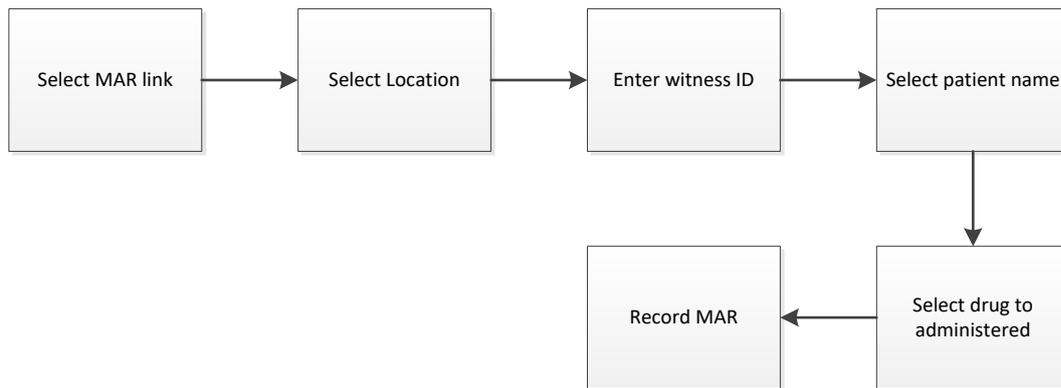

#### 3.2 MAR Overview

##### 3.2.1 MAR Overview

MAR.OVW2: MAR Overview

##### 3.2.2 Block Diagram

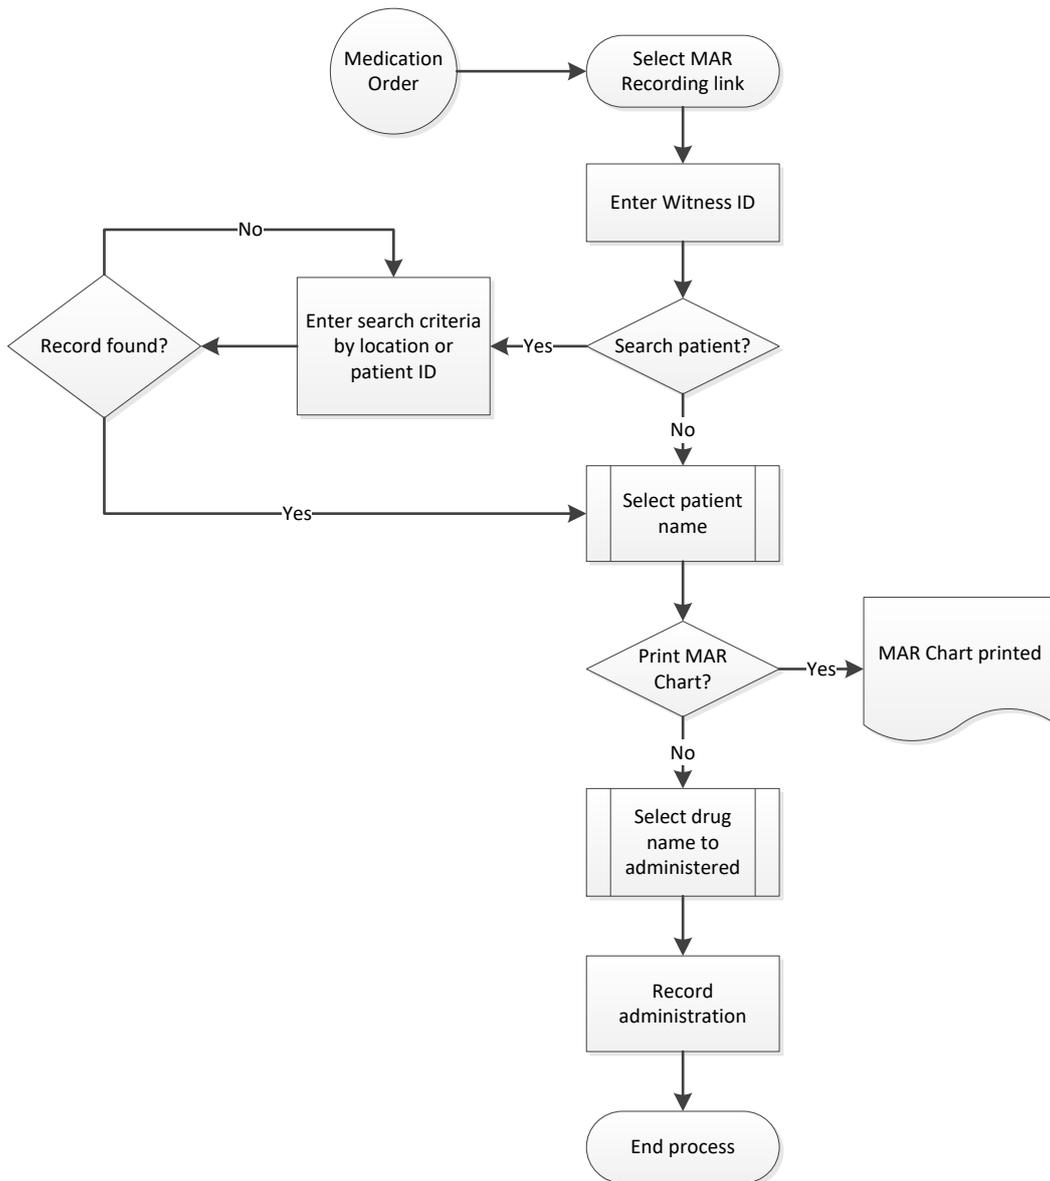

MAR.BD1: MAR Web block diagram

**3.2.3 Purpose**

Medication Administration Record screen allows Nurses to administer patient based on drug and time. The patient name will appear based on granted location of the nurse ID. MAR screen is used for inpatient order only.

**3.2.4 Screen Navigation Diagram**

MAR.SND1: MAR Flow

### 3.2.5 Detail Functionality and Screen
