1.0 Introduction

1.1 Overview of PhIS

Pharmacy Information System or better known as PhIS, is a complete and comprehensive system that integrates pharmacy related services that geared toward pharmacy excellence. PhIS implementation would transform most of current manual process to electronic system would benefit facility end user in the health care sector.

There are 12 modules to assist services delivery by the health care sector which comprises of:

1. Order Management
2. Inpatient Pharmacy
3. Outpatient Pharmacy
4. Medication Counselling
5. Ward Pharmacy
6. Pharmacy Inventory
7. Manufacturing of Cytotoxic Drug Reconstitution, Parenteral Nutrition, IV Admixture & Eye Drop, Radiopharmaceuticals and Extemporaneous
8. Adverse Drug Reaction & Drug Allergic (ADR & DAC)
9. Clinical Pharmacokinetics Services (TDM)
10. Drug Information & Consumer Education (DICE)
11. Medication Therapy Adherence Clinic (MTAC)
12. Data Mining (PhARM)

1.2 Purpose and Objectives

This user manual outlines the Pharmacy Inventory (Recall Product) sub-module and its key features and functionalities. The primary objective is to guide users through the process of completing PhIS application process.

User will understand the following activities in details:

- Recall Product Notification from HQ
- Recall Product Notification received by the Facility

1.3 Organised Sections

These are the sections within this document:

- Section 1 : Introduction
- Section 2 : Application Standard Features
- Section 3 : Recall Product
- Section 4 : Acronyms
- Section 5: Link to Inventory Modules

3.0 Recall Product

Overview

Recall Product is a process conducted by the manufacturer and supplier to remove or withdraw pharmaceutical product(s) from all MOH facilities. Recall Product can be happened and caused by a malfunction of critical quality or drug adverse events reported and may cause health risk to the patient during and after the distribution of the product

User Group

This module is intended for Storekeeper and Pharmacists at the Pharmacy Store (subject to user assign by the facility)

Functional Diagram

Figure 3.1

Functional Description

Recall Product comprises of two (2) main functions:

- **HQ Recall Product Notification**

All MOH facilities will receive a Recall Product Notification from HQ followed by a written letter from the respective supplier. The affected item will be returned to the supplier for replacement.

- **Facility Recall Product Notification**

The function of this screen is to view the location(s) of the affected batch in the facility at all levels. The Recall Product Notification will be disseminated to the affected units. Action will be taken accordingly based on facility's SOP.

3.1 HQ Recall Product Notification

User at the Pharmacy Store will receive a Recall Product Notification from HQ at the PhIS Home Page in the Notification sections.
