

## 1. Summary of Ticket Number and Requests on Intervention

No.	Ticket #	Description	Requests	Proposed Solution
1.	I-PHIS008997815S	<b><u>Screening &amp; Verification-Request to able change Start Date Time &amp; End Date Time</u></b> Request to be able pharmacist to change Start Date Time and End Date Time in Intervention screen.	Request enable to change the Start Date when user do the intervention. End Date still not able to change as it will auto calculate when user enter the Start Date.	1. To enable user to change medication information after clicking "Intervention" button instead of modifying individual drugs. This is only applicable at Screening and Preparation stage. However, the changes on the medication is only for start date and duration only, where user will be able to intervene multiple drug at one time.
2.	I-PHIS013742016S	<b><u>No edit button or return button that enable user to go back to previous page</u></b> When error in transcribing detected after order has been confirmed and prepared, we need to hold or stop the medication and need to re-transcribe the prescription back. This process is time consuming. Suggestion: To add EDIT or RETURN button after prescription has been transcribed and order.	To enable do the intervention after transcribe the order.	2. To allow intervene in Screening and Preparation screens, which will allow user to do intervention without modify order. 3. To enable pharmacist to change certain information inside Intervention screen at Screening and Preparation stage, with conditions below: a. If not yet dispensed, user are allow to change Start Date, dose, frequency, duration and Intervention Reason. b. If record is partial dispense, user can intervene the prescripion but modification is not allowed.
3.	I-PHIS013744316S	<b><u>Allow intervention until dispensing process</u></b> User need to stop the medication and re-transcribe the medication if medication error only detected in preparation/dispensing process Current system : Intervention is only allowed until Screening and Verification process  Suggestion : To allow intervention to be done until dispensing process	To enable do intervention at Screening and Preparation stage only. In Dispensing, we still not allow user to do the intervention but use able to re-allocate the reserve quantity or dispense with 0 quantity.	4. Remarks need to be displayed or highlighted to prevent medication error. For this issue, system is to display intervention remark/hyperlink with or without modifying order.

No.	Ticket #	Description	Requests	Proposed Solution
4.	I-PHIS009016115S	<p><b><u>Screening &amp; Verification-Request to be able change order duration for drugs in the prescription</u></b>            Request to be able change order duration for whole drugs in the prescription instead of one by one. Sometime doctor order wrong duration and pharmacist have to intervent to change the date. This going to take times.</p>	<p>Enable user to change order duration during intervention for multiple drugs in the prescription instead of one by one.</p>	
5.	I-PHIS012209915S	<p><b><u>Request to view intervention remarks/hyperlink</u></b>            Refer to previous report 15040692C, user reported pharmacist add intervention remarks but no hyperlink to view intervention remarks at dispensing screen. Due to that pharmacist unable to view the remarks during dispensing. User still unable to see to view intervention remarks.            17/8            Already assist user to check at medication profile. User acknowledge but user request the intervention remark/hyperlink appear with or without modify order.</p>	<p>To enable user to view intervention remarks at dispensing screen.</p>
