

**Proposed Solution**

No.	Ticket #	Description	Requests	Proposed Solution
1.	I-PHIS014066016S (H.Sibu)	<u>Worksheet - 1 regiment per worksheet</u> User request 1 whole regiment per worksheet.	To fit more drug details in one worksheet page.	To update worksheet by reducing row space: Remove Recons Fluid row between drug and diluent and move to Preparation Name.
2.	I-PHIS016048716S (HPSF)	<u>CDR Edit Label - Label printed not tally</u> User reported via email, when using split to 2 label, if she want to make it 2 set of the split label, she should put 2 in the no of label to print, and it should print 4 label. Unfortunately, user only get 2 printed label. User already tried putting 4 in the no of label to print, but only printed 2 label.	To combine function of 'Split Preparation' and 'No of Label to Print' field.	To combine function of 'Split Preparation' and 'No of Label to Print' field.
