No.	Ticket #	Description	Requests	Solution
1.	200001280E	<p><u>Cadangan Ubahsuai Status Alahan Dalam Sistem PHIS</u> <u>Saya dengan hormatnya merujuk kepada perkara di atas.</u></p> <p>2. Untuk makluman tuan/puan, Hospital Kulai telah mendapat teguran semasa Audit Akreditasi mengenai status alahan pesakit dalam profile pesakit. Auditor mencadangkan ruang allergik tidak dibiarkan kosong dan sepatutnya dokumentasi sebagai tiada alahan (iaitu NKDA atau NIL). Pihak Farmasi meneliti sistem PhIS dan mendapati ruangan status alahan pesakit ditetapkan terus kepada No known Allergies . Perkara ini meningkatkan risiko kesilapan pengubatan jika pihak farmasi gagal mengemaskini status alahan sekiranya pesakit ada alahan.</p> <p>3. Pihak kami ingin mencadangkan supaya ruangan stutus alahan ditetapkan kepada sila pilih supaya pengguna perlu memilih sama ada pesakit mempunyai alahan ataupun NKDA. Dengan penetapan baru ini, sistem akan membolehkan semakan silang dibuat oleh anggota lain sekiranya kes-kes di mana anggota farmasi gagal kemaskini maklumat status alahan pesakit.</p> <p>4. Sukacita diingatkan bahawa kes pesakit yang ada alahan tetapi direkod sebagai tiada alahan adalah lebih berbahaya dan memudaratkan pesakit.</p> <p>5. Besarlah harapan kami sekiranya pihak tuan/puan dapat mempertimbangkan cadangan kami dan mengambil tindakan sewajarnya.</p>	<p>To make patient allergy mandatory to declare for newly registered patient</p>	<ol style="list-style-type: none"> 1. Pop up alert message “Please declare Patient Allergy Status” is added when user enter Order screen. 2. Radio button “Need to be assessed” is added in Medication Order > Allergy Tab. 3. For new patient, patient allergy is defaulted as “Allergy: Need to be assessed” in Patient banner 4. Info icon is added beside radio button to display tool tips message. 5. Number of allergies is displayed in patient banner.
